Better Data Better Decisions Using Business Intelligence In The Medical Practice:

Even Better Data, Better Decisions: Advanced Business Intelligence for the Medical Practice Nate Moore, 2017-10-23

What information do you need to see to drive growth and improve the bottom line in your practice Identifying right information to be delivered at the right time to the right people can be a game changer for the performance of medical practices Business intelligence BI is not just a fancy name applied to the same old canned reports from disparate data sources BI when done correctly drives practice performance It delivers mission critical data exactly when it is needed without manual sorting through pages and pages and columns and columns of data True BI combines data from two or more discrete datasets to provide a more dimensional view of the data For instance combining upcoming appointments with historical clinical data or front desk collections with staffing data produces reports that can offer guidance to support real time decisions and actions This book is full of techniques to combine data to deliver actionable insights and drive performance that can be applied to each unique practice situation The results lead to a more efficient profitable flexible and responsive medical practice that delivers higher quality patient care THIS BOOK WILL PROVIDE YOU WITH THE STRATEGIES TO Design more efficient staff models Predict gaps in provider schedules Track and diagnose common errors for denied claims Optimize referral patterns Track delinquent patient payment Monitor Medicare quality codes And much more

Better Data, Better Decisions Nate Moore, Mona Reimers, 2013 Data flows into medical practices daily from practice management systems electronic medical record EMR systems accounting systems and many other sources Too many practices extract only the bare minimum of data to file claims and meet reporting obligations without recognizing the value in the flood of data that passes through the practice

Financial Institution Advantage and the Optimization of Information Processing Sean C. Keenan, 2015-02-03. A PROVEN APPROACH FOR CREATING and IMPLEMENTING EFFECTIVE GOVERNANCE for DATA and ANALYTICS. Financial Institution Advantage and the Optimization of Information Processing offers a key resource for understanding and implementing effective data governance practices and data modeling within financial organizations. Sean Keenan, a noted expert on the topic, outlines the strategic core competencies, includes best practices, and suggests a set of mechanisms for self evaluation. He shows what it takes for an institution to evaluate its information processing capability and how to take the practical steps toward improving it. Keenan outlines the strategies and tools needed for financial institutions to take charge and make the much needed decisions to ensure that their firm's information processing assets are effectively designed, deployed, and utilized to meet the strict regulatory guidelines. This important resource is filled with practical observations about how information assets can be actively and effectively managed to create competitive advantage and improved financial results. Financial Institution Advantage and the Optimization of Information Processing also includes a survey of case studies that highlight both the positive and less positive results that have stemmed from institutions either recognizing or failing to recognize the strategic importance of information processing capabilities.

Big Data for Big Pharma Malena Johannes, 2016-06-16. Raising costs, ever increasing regulatory hurdles, and mounting difficulties in finding the next blockbuster drug are just a few of the challenges Big Pharma currently has to face for its research and development process, the heart of its risky business. Big Data claims to be full of insights that Big Pharma needs to find a way of harvesting, which could lead to new compounds. Academics, Big Data start ups, and pharmaceutical companies have focused their research efforts on analytic tools and data technologies to store, collect, analyze, and extract these insights from massive data sets. However, the key question is whether the Big Data hype really does have the claimed accelerating effect on the complex research and development process, or if it actually creates another hurdle for Big Pharma innovation. Malena Johannes' timely book sheds light on this question by examining the top 5 pharmaceutical companies and provides an overview on the status quo of Big Data applications within the pharmaceutical industry.
