The Urbanism of Metabolism Raffaele Pernice, 2022-03-16 This edited book explores and promotes reflection on how the lessons of Metabolism experience can inform current debate on city making and future practice in architectural design and urban planning More than sixty years after the Metabolist manifesto was published the author's original contributions highlight the persistent links between present and past that can help to re-imagine new urban futures as well as the design of innovative intra-urban relationships and spaces The essays are written by experienced scholars and renowned academics from Japan Australia Europe South Korea and the United States and expose Metabolism's special merits in promoting new urban models and evaluate the current legacy of its architectural projects and urban design lessons They offer a critical intellectual and up-to-date account of the Metabolism projects and ideas with regard to the current evolution of architectural and urbanism discourse in a global context The collection of cross-disciplinary contributions in this volume will be of great interest to architects architectural and urban historians as well as academics scholars and students in built environment disciplines and Japanese cultural studies

Amphibious Concepts at the Edge of the Sea Joerg Baumeister, Ioana C. Giurgiu, Daniela A. Ottmann, 2025-02-14 This book explores interfaces between land and sea and their geostrategic ecological urban productive indigenous legal historical and artistic dimensions The oceans comprising two thirds of the earth's surface were initially utilised mainly for transportation and fishing Today they serve diverse purposes such as supplying energy freshwater mineral resources supporting leisure activities and providing habitat Additionally the UN set up the first international agreement establishing Marine Protection Areas for a third of the sea to mitigate the growing use and exploitation The more interest in oceans territories increases the more the question arises about the beneficial evolution of their physical and legal boundaries What innovative amphibious concepts can be developed for the edge of the sea The book pushes the boundaries of current knowledge to provide a deeper insight into the upcoming challenges and opportunities making it easier to apply the best strategies for a healthy future for both the ocean and humanity

Architecturalized Asia Vimalin Rujivacharakul, H. Hazel Hahn, Ken Tadashi Oshima, Peter Christensen, 2013-11-01 How did terms like Asia Eurasia Indochina Pacific Rim or Australasia originate and evolve and what are their connections to the built environment In addressing this question *Architecturalized Asia* bridges the fields of history and architecture by taking Asia as a discursive structure and cultural construct whose spatial and ideological formation can be examined through the lenses of cartography built environments and visual narratives The first section on the study of architecture in Asia from the medieval through early modern periods examines icons and symbols in maps as well as textual descriptions produced in Europe and Asia The second section explores the establishment of the field of Asian architecture as well as the political and cultural imagining of Asia during the long nineteenth century when Asia and its regions were redefined in the making of modern world maps

mainly produced in Europe The third section examines tangible structures produced in the twentieth century as legible documents of these notional constructions of Asia In exploring the ways in which Asia has been drawn and framed both within and without the continent this volume offers cutting edge scholarship on architectural history world history and the history of empires Written by architectural historians and historians specializing in Asia and European empires this unique volume addresses the connection between Asia and the world through the lenses of built environments and spatial conceptualizations Architecturalized Asia will appeal to readers who are interested in Asian architecture world architecture Asian history history of empires and world history

The Metabolist Imagination William O. Gardner, 2020-04-14 Japan's postwar urban imagination through the Metabolism architecture movement and visionary science fiction authors The devastation of the Second World War gave rise to imaginations both utopian and apocalyptic In Japan a fascinating confluence of architects and science fiction writers took advantage of this space to begin remaking urban design In *The Metabolist Imagination* William O. Gardner explores the unique Metabolism movement which allied with science fiction authors to foresee the global cities that would emerge in the postwar era This first comparative study of postwar Japanese architecture and science fiction builds on the resurgence of interest in Metabolist architecture while establishing new directions for exploration Gardner focuses on how these innovators created unique versions of shared concepts including futurity megastructures capsules and cybercities making lasting contributions that resonate with contemporary conversations around cyberpunk climate change anime and more *The Metabolist Imagination* features original documentation of collaborations between giants of postwar Japanese art and architecture such as the landmark 1970 Osaka Expo It also provides the most sustained English language discussion to date of the work of Komatsu Saky considered one of the big three authors of postwar Japanese science fiction These studies are underscored by Gardner's insightful approach treating architecture as a form of speculative fiction while positioning science fiction as an intervention into urban design making it a necessary read for today's visionaries

The Ocean as a Creative Experience Juergen Claus, 2023-03-31 This book by artist diver and editor in chief of an underwater magazine Juergen Claus is a milestone among the books dedicated to the planet sea It is a knowledge rich overview created from facts and experiences of three main themes that have never been described in context Marine architectures from both the Pacific and Atlantic regions have now moved from vision to reality Whether it is a sail shaped architecture in Noumea or a whale shaped one in the Arctic region Special attention is paid by Prof Claus to post disaster architecture The book will encourage young readers to design metabolic buildings themselves That the seascape has also become a fluid studio for visual artists may come as a surprise The works of art some of which the author has experienced first hand have intertwined with an ecological sustainable way of working And this is also true to a special degree for the sound artists They realize their sonic worlds with recordings from the sounding world underwater a concert hall of hitherto unknown dimensions The author's experience as a professor of media art with students flows into the

description of multimedia or media related ocean installations Here the book becomes a stimulus for realizing one's own experiences

Oceanic Japan Stefan Huebner, Nadin Heé, Ian Jared Miller, William M. Tsutsui, 2024-11-30 Japan's oceans demand our attention Violent prolific and changeful they define life and death on the archipelago pushing the shore under the rush of tsunami charging typhoon circulation feeding millions and seeding conflicts over territory and resources And yet Japan studies remains largely beholden to a terrestrial view of the world that is at odds with the importance of the sea This terrestrial bias also means that on those occasions when oceans are recognized they are most often presented as dividers or connectors spaces in between rather than rich ecologies and meaningful sites Oceanic Japan is meant to help readers re envision Japanese history in order to show how the seas created the country that we know today The book convenes a diverse multinational multidisciplinary group of scholars to expand the scope of Japan studies and the field of environmental humanities The chapters draw from the broader turn to the sea characterized by new oceanic and terraqueous perspectives developing within these fields and in areas such as Pacific history and Indian Ocean studies The volume editors vision is bifocal On one hand they aim to reorient East Asian studies and Japan studies to the sea underlining how oceans have shaped dynamics from the Tokugawa Era forward into the age of empire and the crisis of the Anthropocene On the other hand they argue for a more nuanced environmental approach within the burgeoning field of Oceanic studies Seeing oceanic spaces as more than entrepôts or political spheres requires thinking in new often vertical volumetric ways The chapters follow human and non human actors to recognize the variegation of watery ecologies through winds tides coasts seabeds and currents such as the Kuroshio and Oyashio which have always shaped life on the archipelago

The Water Will Come Jeff Goodell, 2017-10-24 What if Atlantis wasn't a myth but an early precursor to a new age of great flooding Across the globe scientists and civilians alike are noticing rapidly rising sea levels and higher and higher tides pushing more water directly into the places we live from our most vibrant historic cities to our last remaining traditional coastal villages With each crack in the great ice sheets of the Arctic and Antarctica and each tick upwards of Earth's thermometer we are moving closer to the brink of broad disaster By century's end hundreds of millions of people will be retreating from the world's shores as our coasts become inundated and our landscapes transformed From island nations to the world's major cities coastal regions will disappear Engineering projects to hold back the water are bold and may buy some time Yet despite international efforts and tireless research there is no permanent solution no barriers to erect or walls to build that will protect us in the end from the drowning of the world as we know it The Water Will Come is the definitive account of the coming water why and how this will happen and what it will all mean As he travels across twelve countries and reports from the front lines acclaimed journalist Jeff Goodell employs fact science and first person on the ground journalism to show vivid scenes from what already is becoming a water world An immersive mildly gonzo and depressingly well timed book about the drenching effects of global warming and a powerful reminder that we can bury our heads in the sand about climate change for only so long before the

Modern Architecture: A Critical History (Fifth) (World of Art) Kenneth Frampton, 2020-09-08 An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton Kenneth Frampton's highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980 Starting with the cultural developments since 1750 that drove the modern movement moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of international celebrity architects this book is the definitive history of modern architecture For this extensively revised and updated fifth edition of Modern Architecture Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably and create structures that will withstand changing climates This new edition features completely redesigned interiors and an updated and expanded bibliography making this volume more indispensable than ever

Prior Art Peter H. Christensen, 2024-05-07 A groundbreaking text on the history of the use of patents in architecture Although patents existed in Renaissance Italy and even in Confucian thought it was not until the middle third of the nineteenth century that architects embraced the practice of patenting in significant numbers Patents could ensure as they did for architects engineering brethren the economic and cultural benefits afforded by exclusive intellectual property rights But patent culture was never directly translatable to the field of architecture which tended to negotiate issues of technological innovation in the context of the more abstract issues of artistic influence and formal expression In Prior Art scholar Peter Christensen offers the first full scale monographic treatment of this complex relationship between art and invention Christensen's method a site oriented approach steeped in multinational and multilingual archival work is geared toward unifying fractured global histories of architectural patents through the distinct union of architectural cultural and legal history Prior Art offers a record of the marriage of intellectual property and architectural invention a momentous understudied and still underutilized aspect of architectural culture in the nineteenth and twentieth centuries and the ways in which it influenced how buildings are conceived designed engineered constructed and promoted
