Between Light and Shadow Mac Darrow, 2003-03-20 Much has been written on the human rights relevance and impacts of the policies and activities of the World Bank and IMF or International Financial Institutions IFIs However while many of the human rights based critiques of the Bank and Fund purport to link broadly defined reforms with obligations under international human rights law rarely has this been carried out through a rigorous and in depth application of international legal rules governing the proper interpretation of the institutions mandates and rarely have the policy consequences and practical possibilities for human rights integration been explored in any detail These are the principal gaps that the present book aims to fill by reference to a sample of the IFIs most important and controversial contemporary activities

A Corpus of Rembrandt Paintings V Ernst van de Wetering,2013-12-12 This volume is the fifth volume of A Corpus of Rembrandt Paintings a project devoted to all Rembrandt's paintings This is the work of The Rembrandt Research Project

consisting of a group of scholars led since 1993 by Professor Ernst van de Wetering. The project began in 1968 with the aim of separating Rembrandt's own paintings from the vast number of Rembrandtesque paintings made by his many apprentices and followers. Having opted for a chronological approach to the cataloguing of Rembrandt's paintings from 1625 till 1642 in the first three volumes, it was decided in 1993 to adopt a thematic approach for further volumes. This was largely to facilitate the recognition of different hands. The new approach yielded much more information not only about Rembrandt's working methods but also about the function and meaning of his works. This expanded field of view meant that etchings and drawings with similar themes also needed to be included. In 2005 Volume IV appeared devoted to Rembrandt's self-portraits in painting, etching and drawing. Volume V consists of a catalogue and analysis of the so-called small-scale history and genre paintings. That theme was chosen because this type of complex work shows a variety of full-length protagonists acting in different narrative settings. For this reason, in the 17th century painting, etching or drawing biblical and mythological scenes was looked upon as an artist's greatest challenge. The choice of this theme proved to be highly fruitful in several ways. Small-scale history pieces reveal Rembrandt's artistic ambitions most clearly. They also offer the authors a much more accurate view of the daily routine in Rembrandt's studio; his apprentices mostly copied this type of work or used it as a starting point for their own. As a result, it was easier to distinguish the works by the master himself from those of his pupils. All aspects of the skills necessary to create a pictorial illusion play a part in the creation of small-figured history paintings. These aspects were referred to as the basis of the noble art of painting in Rembrandt's days. Two seventeenth-century painter-theoreticians discussed these principles systematically in two books which up till now have only sporadically been consulted in the context of 17th-century studio practice. Karel van Mander wrote his *Grond der edel vry schilderconst* (Basis of the Art of Painting) in 1604, and Samuel van Hoogstraten produced his *Inleyding tot de hooge schoole der schilderkonst* (Academy of Painting) in 1678. Van Hoogstraten was a pupil of Rembrandt between 1642 and 48. Comparing the two books and considering them in relation to Rembrandt's oeuvre gradually reveals his original views on painting and how these had developed during his career. Thus the authors of this new Volume of *A Corpus* have gained an unexpected and profound insight into Rembrandt's ideas and approach to his art. The basic aspects of painting included the following topics: function and methods of drawing; human proportions; various positions, poses and gestures of figures; ways of arranging a scene's protagonists in a composition; facial expressions of a variety of emotions; light, shadows and reflected light; landscape and animals; draperies and articles of clothing; methods of painting and various characteristics and uses of colours. The way these basic aspects were selected and dealt with presumed that the more practical side to the art of painting would be learned by the apprentice in the daily routine of his master's studio. With the development of art history in the nineteenth century, the basic aspects of the art of painting listed above acquired the vague label of style. However, the seventeenth-century categorization of the basic aspects provides a much more acute means of probing the views and criteria for judging a painting by Rembrandt and his contemporaries than

the concept of style Volume V in the series A Corpus of Rembrandt Paintings breaks new ground from the point of view of art history not only in its approach to Rembrandt as an artist but more particularly to his thinking about painting Moreover a detailed comparison of Rembrandt s works and those by his apprentices who based their works on his led to a profound and detailed understanding of Rembrandt s views on pictorial quality In art historical literature quality usually does not feature prominently since it is regarded as being too subjective This comparative approach together with the analysis of seventeenth century categories of thought about painting have given the research on Rembrandt a new impetus at the same time allowing us to see more clearly through seventeenth century eyes That is why the new volume of the Corpus is an important publication not only for art historians but also for all who want to fully enjoy the numerous works of art that date back to the Dutch Golden Age now scattered in museums around the world
