Beyond 1995 The Future Of The Npt Regime Issues In International Security:

Challenges to American National Security in the 1990s M. Nacht,A. Nichols,G.H. Quester,J.J. Weltman,2012-12-06

The decade of the 1990s offers a chance to build a new and better international order What policy choices will this decade pose for the United States This wide ranging volume of essays imaginatively addresses these crucial issues The peaceful revolutions of 1989 1990 in the Soviet Union and Eastern Europe have swept away the foundations of the Cold War The Eastern European nations are free Europe is no longer divided Germany is united The Soviet threat to Western Europe is ending with the collapse of the Warsaw Pact and the withdrawals and asymmetrical cuts of Soviet forces And U S Soviet rivalry in the Third World is giving way to cooperation in handling conflicts as in Iraq and elsewhere Much of course remains uncertain and unsettled What sort of Soviet Union will emerge from the ongoing turmoil with what political and economic system and what state structure How far and how soon will the Eastern European states succeed in developing pluralist democracies and market economies Are the changes irreversible Certainly there will be turmoil backsliding and failures but a return to the Cold War hardly seems likely

The Future of the International Nuclear Non-Proliferation Regime

Marianne van Leeuwen,2023-10-20 The 1995 conference on the review and extension of the Nuclear Non Proliferation Treaty may well mark an important turning point The treaty itself but also the wider international regime built around it are at stake The Future of the International Nuclear Non Proliferation Regime deals with various aspects of the problems of nuclear proliferation and the international struggle against it Authors from Europe the United States and Australia have contributed to this book which was produced under the auspices of the Netherlands Institute of International Relations Clingendael The reader is first offered regional case studies on North Korea South Asia the Middle East and the former Soviet Union followed by chapters on nuclear safeguards and export controls systems and contributions on a Comprehensive Test Ban Treaty and security guarantees The two concluding chapters evaluate and propose policies to strengthen the non proliferation regime beyond 1995 It will be of interest to policy makers students of international relations and journalists

Nuclear Weapons in the Changing World Patrick J. Garrity,Steven A. Maaranen,2012-12-06 Lawrence Freedman One of the major bonuses of the collapse of communism in Europe is that it may never again be necessary to enter into a sterile debate about whether it is better to be red or dead This appeared as the ultimate question in the great nuclear debate of the early 1980s When put so starkly the answer appeared obvious better to live and struggle in a totalitarian system than to destroy totalitarian and democratic systems alike There were a number of points to be made against this Communist regimes had demonstrated the possibility of being both red and dead while the West had managed successfully to avoid the choice If we allowed nuclear disarmament to become an overriding priority this might encourage excessive respect for Soviet interests and a desire to avoid any sort of provocation to Moscow a point not lost on those in Eastern Europe who were then struggling against repression and could not see why disarmament should be given a higher priority than freedom Now that the old communist

states have liberated themselves and the West no longer risks conspiring in their enslavement there is a correspondingly reduced danger of mass death As a result and with so much else of immediate Lawrence Freedman Department of War Studies King s College University of London London WC2R 2LS England Nuclear Weapons in the Changing World Perspectives from Europe Asia and North America **Beyond 1995** R.E. Pendley,J.F. Pilat,2012-12-06 There is almost universal support for the view that the world would be an even more dangerous place if there were to be more nuclear weapon states There would be more fingers on more triggers and probably a greater risk that a trigger might be pulled with incalculable consequences It is easy to see therefore that there is a collective interest in avoiding the spread of nuclear weapons to further countries Nations do not however normally undertake or refrain from actions because of such a collective interest they do so because of their individual interests This is especially true in the field of national security A nation perceiving that it has a real interest in developing nuclear weapons is not very likely to refrain from doing so merely because it is told such development would be bad for the world community If the global interest in avoiding the spread of nuclear weapons to more countries is to succeed conditions that make it in the interest of each individual nation to renounce nuclear weapons need to be created or maintained Fortunately conditions have prevailed in which the vast majority of nations have seen an advantage in making legally binding nonproliferation commitments An important rationale for many of these countries has been that these commitments would facilitate the transfer of desired civil nuclear technology European Security in the 1990s W. Laqueur,L. Sloss,2013-11-11 Rarely if ever have the political economic and military foundations of the Western Alliance been in such a state of flux Walter Laqueur and Leon Sloss therefore deserve credit not just for the quality of the analysis in this superb book but also for the timeliness of its appearance As Laqueur says in his chapter Touring the Western European Defense Horizon if the likely development of European defense policies is not particularly reassuring at least it gives no grounds for despair The list of problems we face is a daunting one First there is the spiralling cost of defense expenditures particularly in the absence of significant NATO or inter European cooperation This is particularly serious in light of the reluctance to increase or even maintain current expenditures in the midst of Mikhail Gorbachev s peace offensive and the extraordinary changes in Eastern Europe both of which have had a dramatic impact on Western public opinion There is also a problem in the perceived relative economic decline of the United States vis a vis Western Europe and Japan which only exacerbates calls to reduce the number of American troops in Europe Other dangers to the political cohesion and military credibility of the alliance include demographic trends that threaten current manpower levels transatlantic acrimony over the burden sharing issue and political pressures particularly in West Germany toward denuclearization and even neutralism

Networked Nonproliferation Michal Onderco,2021-10-05 The Treaty on Non Proliferation of Nuclear Weapons NPT had many opponents when in 1995 it came up for extension The majority of parties opposed extension and experts expected a limited extension as countries sought alternative means to manage nuclear weapons But against all predictions the treaty

was extended indefinitely and without a vote Networked Nonproliferation offers a social network theory explanation of how the NPT was extended giving new insight into why international treaties succeed or fail The United States was the NPT's main proponent but even a global superpower cannot get its way through coercion or persuasion alone Michal Onderco draws on unique in depth interviews and newly declassified documents to analyze the networked power at play Onderco not only gives the richest account yet of the conference looking at key actors like South Africa Egypt and the EU but also challenges us to reconsider how we think about American power in international relations With Networked Nonproliferation Onderco provides new insight into multilateral diplomacy in general and nuclear nonproliferation in particular with consequences for understanding a changing global system as the US the chief advocate of nonproliferation and a central node in the diplomatic networks around it declines in material power

Nuclear Disarmament in International Law

Haralambos Athanasopoulos, 2000-02-01 When German physicists Otto Hahn and Fritz Strassman first split the uranium atom in 1938 they might have little imagined the potential power their experiments had unleashed Since the United States successfully detonated the first atomic weapons in 1945 the entire world has lived in fear of annihilation Technological advances in weaponry and importantly their delivery systems have only heightened the sense of dread Yet since the end of World War II world governments have been unable to agree on a strategy for nuclear disarmament This led first to the Cold War and ultimately to the proliferation of nuclear weapons throughout the world This work examines the nuclear question within the framework of international law The advent of the nuclear age and its impact on postwar peace and law is first covered This is followed by analyses of the initial United Nations disarmament initiatives and the reasons they were doomed from the start The globalization of the Cold War the expansion of the nuclear arms race and the START treaties and the legacy of 1970s era detente efforts in the years leading up to the end of the Cold War are then detailed How the United Nations reacted to the end of the Cold War and the prospects for disarmament in the 21st century are the subjects of the concluding section

Critical Reflections on Security and Change Stuart Croft, Terry Terriff, 2013-02-01 The contributors reflect critically on security studies since the 1980s They conclude that analysts and policy makers have not been able to respond well to the changes that have occurred and that they must revise their approach if they are to meet the challenges of the future

Regional Pathways to Nuclear Nonproliferation Wilfred Wan, 2018 This book makes a case for a reorientation of the nuclear nonproliferation regime posing an alternative conceptualization of nuclear order centered on the regional level It draws on an array of theoretical tools from the literatures on regionalism security governance and international institutions developing a framework that analyzes the conditions that would allow for more robust regional nuclear cooperation These include the presence of 1 institutional architecture 2 political economic and military relations among states and 3 fundamental regional awareness and identity Wan then deploys this theoretical approach to several case studies including Northeast Asia Southeast Asia and the Middle East focusing on two interrelated questions First what is the viability of a

stronger regional nuclear order in the region Second what form would such an order most likely take In the process the book identifies the magnitude and character of the proliferation challenge specific to each region It also considers the existing character of nuclear cooperation at the regional level Wan presents the historical development of regional nuclear order in Latin America as a model for the rest of the world In this area regional institutions ranging from organizations to dialogues to ad hoc arrangements gradually became more involved across economic environmental and human security domains providing the foundation for multilateral cooperation in the nuclear arena As his analysis shows in light of the contemporary proliferation landscape the establishment and strengthening of such regional nuclear orders is essential **Legal**

Resolution of Nuclear Non-Proliferation Disputes James D. Fry, 2013-12-19 How viable is the resolution of nuclear non proliferation disputes through the International Court of Justice and international arbitration James Fry examines the compromissory clauses in the IAEA Statute IAEA Safeguards Agreements and the Convention on the Physical Protection of Nuclear Material that give jurisdiction to these fora and analyses recent jurisprudence to demonstrate how legal resolution can handle such politically sensitive disputes In sum legal resolution of nuclear non proliferation disputes represents an option that States and commentators have all too often ignored The impartiality and procedural safeguards of legal resolution should make it an acceptable option for target States and the international community especially vis vis the procedural shortcomings and general heavy handedness of Security Council involvement under UN Charter Chapter VII
