in the Age of Digital Media Leo W. Jeffres, David J. Atkin, Kimberly A. Neuendorf, 2022-12-05 This volume bridges the divide between film and media studies scholarship by exploring audience expectations of film and TV genre in the age of digital streaming using qualitative thematic and quantitative data driven analyses Through four ground breaking surveys of audience members and content creators the authors have empirically determined what audiences expect of various genres the extent to which these definitions match those of scholars and critics and the overall variation and complexity of audience expectations in the age of media abundance They also examine audience habits and preferences drawing from both theory and original empirical analyses with a view toward the implications for the moving image in a rapidly changing media environment The book draws from the data to develop a number of new concepts including genre repertoire genre hybridity audience interest maximization and variety seeking and a new stage of genre development genre bending It is an ideal resource for students and scholars interested in the symbiotic relationship between audiences and the moving image products they consume as well as the way the current digital media environment has impacted our understanding of film and TV genres

Opera Cinema Joseph Attard, 2022-06-16 Since 2006 leading opera companies have beamed their shows to thousands of cinema screens all over the world live Opera cinema is the most successful marriage of this elaborate esoteric art form and the silver screen In the twenty first century more people watch opera on cinema screens than the stage But what is different about watching Massenet at the multiplex compared to a traditional stage performance Is opera cinema a new hybrid art form in its own right or merely a new way of engaging with an old one Is it bringing new opera fans into the fold Is there a danger it could one day eclipse the stage altogether This book deals with these questions by charting the history of opera transmissions exploring how digital media changes our relationship with culture and inviting a group of opera virgins to give their impressions on this developing cultural experience

The Post-Screen Through Virtual Reality, Holograms and Light Projections Jenna Ng, 2025-10-01 Screens are ubiquitous today Yet contemporary screen

media eliminate the presence of the screen and diminish the visibility of its boundaries As the image becomes indistinguishable from the viewer's surroundings this unsettling prompts re-examination of how screen boundaries demarcate Through readings of three media forms Virtual Reality holograms and light projections this book develops new theories of the surfaces on and spaces in which images are displayed Interrogating contemporary contestations of reality against illusion it argues that the disappearance of difference reflects shifted conditions of actuality and virtuality in understanding the human condition These shifts further connect to the current state of politics by way of their distorted truth values corrupted terms of information and internalizations of difference The Post Screen Through Virtual Reality Holograms and Light Projections thus thinks anew the image's borders and delineations evoking the screen boundary as an instrumentation of today's intense virtualizations which do not tell the truth In the process a new imagination for images emerges for a glut of the virtual for new conceptualizations of object and representation materiality and energies media and histories real and unreal for new understandings of appearances dis-appearances replacement and replacement the post screen

DVD, Blu-ray and Beyond Jonathan Wroot, Andy Willis, 2017-11-03 This book demonstrates in contrast to statistics that show declining consumption of physical formats that there has not been a mass shift towards purely digital media Physical releases such as special editions DVD box sets and Blu-rays are frequently promoted and sought out by consumers And that past formats such as VHS Laserdisc and HD DVD make for sought after collectible items These trends are also found within particular genres and niche categories such as documentary education and independent film distribution Through its case studies this collection makes a distinctive and significant intervention in highlighting the ways in which the film industry has responded to rapidly changing markets This volume global in scope will prove useful to those studying the distribution and exhibition of films and the economics of the film industry around the world
