Computer-Assisted Simulation of Dynamic Systems with Block Diagram Languages Nicholas M.

Karayanakis, 1993-06-24 Computer Assisted Simulation of Dynamic Systems with Block Diagram Languages explores the

diverse applications of these indispensable simulation tools The first book of its kind it bridges the gap between block diagram languages and traditional simulation practice by linking the art of analog hybrid computation with modern pc based technology Direct analogies are explored as a means of promoting interdisciplinary problem solving The reader progresses step by step through the creative modeling and simulation of dynamic systems from disciplines as diverse from each other as biology electronics physics and mathematics The book guides the reader to the dynamic simulation of chaos conformal mapping VTOL aircraft and other highly specialized topics Alternate methods of simulating a single device to emphasize the dynamic rather than schematic features of a system are provided Nearly forgotten computational techniques like that of integrating with respect to a variable other than time are revived and applied to simulation and signal processing Actual working models are found throughout this eminently readable book along with a complete international bibliography for individuals researching subjects in dynamic systems This is an excellent primary text for undergraduate and graduate courses in computer simulation or an adjunct text for a dynamic systems course It is also recommended as a professional reference book

PC-BASED INSTRUMENTATION MATHIVANAN, N.,2007-01-21 This well organized book is intended for the undergraduate students of Electrical Electronics and Communications Computer Instrumentation and Instrumentation and Control Engineering and postgraduate students of science in Electronics Physics and Instrumentation Data acquisition being the core of all PC based measurements and control instrumentation systems engineering this book presents detailed discussions on PC bus based data acquisition remote data acquisition GPIB data acquisition and networked data acquisition configurations This book also describes sensors signal conditioning and principles of PC based data acquisition It provides several latest and advanced techniques This book stresses the need for understanding the use of Personal Computers in measurement and control instrumentation applications **KEY FEATURES** Provides several laboratory experiments to help the readers to gain hands on experience in PC based measurement and control Provides a number of review questions problems with solutions to the odd numbered problems and objective type questions with solutions Presents a number of working circuits design and programming examples Presents comparison of properties features and characteristics of different bus systems interface standards and network protocols Includes the advanced techniques such as sigma delta converter RS 485 I2C bus SPI bus FireWire IEEE 488 2 SCPI and Fieldbus standards
