Bomb Scare The History And Future Of Nuclear Weapons:

Bomb Scare Joseph Cirincione,2007 **Bomb Scare** Joseph Cirincione,2007-02-27 A welcome antidote to the strange confluence of Nuclear Non Proliferation Treaty NPT opponents by one of America s best known weapons experts Christopher F Chyba Science With clarity and expertise Joseph Cirincione presents an even handed look at the history of nuclear proliferation and an optimistic vision of its future providing a comprehensive survey of the wide range of critical perspectives Cirincione begins with the first atomic discoveries of the 1930s and covers the history of their growth all the way to current crisis with Iran He unravels the science strategy and politics that have fueled the development of nuclear stockpiles and increased the chance of a nuclear terrorist attack He also explains why many nations choose not to pursue nuclear weapons and pulls from this the outlines of a solution to the world s proliferation problem a balance of force and diplomacy enforcement and engagement that yields a steady decrease in these deadly arsenals Though nuclear weapons have not been used in war since August 1945 there is no guarantee this good fortune will continue A unique blend of history theory and security analysis Bomb Scare is an engaging text that not only supplies the general reader and student with a clear understanding of this issue but also provides a set of tools policymakers and scholars can use to prevent the cataclysmic consequences of another nuclear attack Invaluable Bomb Scare ought to be read by everyone as a matter of life and death New York Review of Books **Bomb Scare** Joseph Cirincione,2007 **Nuclear Nightmares** Joseph Cirincione,2013-11-26 There is a high risk that someone will use by accident or design one or more of the 17 000 nuclear weapons in the world today Many thought such threats ended with the Cold War or that current policies can prevent or contain nuclear disaster They are dead wrong these weapons possessed by states large and small stable and unstable remain an ongoing nightmare Joseph Cirincione surveys the best thinking and worst fears of experts specializing in nuclear warfare and assesses the efforts to reduce or eliminate these nuclear dangers His book offers hope in the 1960s twenty three states had nuclear weapons and research programs today only nine states have weapons More countries have abandoned nuclear weapon programs than have developed them and global arsenals are just one quarter of what they were during the Cold War Yet can these trends continue or are we on the brink of a new arms race or worse nuclear war A former member of Senator Obama s nuclear policy team Cirincione helped shape the policies unveiled in Prague in 2009 and as president of an organization intent on reducing nuclear threats he operates at the center of debates on nuclear terrorism new nuclear nations and the risks of existing arsenals **The Rise of Nuclear Fear** Spencer R. Weart,2012-03-19 After the Fukushima Nuclear Power Plant had a meltdown protesters around the world challenged nuclear power Climate change has never aroused this visceral dread Weart dissects this paradox showing that powerful images surrounding nuclear energy hold us captive allowing fear rather than facts to drive our thinking and public policy *Abolition of Nuclear Weapons as a Moral Imperative* John Kultgen,2015-02-17 Abolition of Nuclear Weapons as a Moral Imperative argues that the use of nuclear weapons as a threat

in policies of nuclear deterrence violate basic principles of morality and consequently the abolition of nuclear weapons from the world is a moral imperative nations that have them The focus is on the United States since it will have to take the lead in any program of abolition The argument is formulated in terms accessible to theorists in different disciplines and activists in a large range of causes It appeals to principles that are widely shared but whose application to national policies especially to deterrence by threats of mass destruction has been debated ever since nuclear weapons were developed The book explains what is meant by the immorality of a national policy the stake which citizens have in their agents acting morally and the role of their opinions in seeing that they do The argument of the book is couched in terms of consequences The effects of the U S nuclear deterrent on the probability of nuclear war are difficult to calculate but the harms for the country and others across the globe caused by the immense apparatus necessary to make U S threats credible are sufficient to condemn the policy The last part of the book is devoted to way the U S can take the lead in safe and effective steps necessary to abolish the weapons and prevent their reintroduction into the world

Five Myths about Nuclear Weapons Ward Wilson,2013 Expanded from an article that created a stir in foreign policy circles this book shows why five central arguments promoting nuclear weapons are in essence myths
