E. Irving,Costas Soutis,2014-09-17 Polymer composites are increasingly used in aerospace applications due to properties such as strength and durability compared to weight Edited by two leading authorities in the field this book summarises key recent research on design manufacture and performance of composite components for aerospace structures Part one reviews the design and manufacture of different types of composite component Part two discusses aspects of performance such as stiffness strength fatigue impact and blast behaviour response to temperature and humidity as well as non destructive testing and monitoring techniques **Bibliography of Nautical Books** ,1998

Unsettled Issues Concerning Integrated Vehicle Health Management Systems and Maintenance Credits Ravi Rajamani,2020-05-27 The holy grail for prognostics and health management PHM professionals in the aviation sector is to have integrated vehicle health management IVHM systems incorporated into standard aircraft maintenance policies Such a change from current aerospace industry practices would lend credibility to this field by validating its claims of reducing repair and maintenance costs and hence the overall cost of ownership of the asset Ultimately more widespread use of advanced PHM techniques will have a positive impact on safety and for some cases might even allow aircraft designers to reduce the weight of components because the uncertainty associated with estimating their predicted useful life can be reduced We will discuss how standard maintenance procedures are developed who the various stakeholders are and based on this understanding outline how new PHM systems can gain the required approval to be included in these standard practices There have been a few limited successes in this field already and we will discuss the lessons learned in developing these systems Finally we will review the progress that the structural health management SHM community has made and continues to make to change the way the industry regards automated SHM systems NOTE SAE EDGE Research Reports are intended to identify and illuminate key issues in emerging but still unsettled technologies of interest to the mobility industry The goal of SAE EDGE Research Reports is to stimulate discussion and work in the hope of promoting and speeding resolution of identified issues SAE EDGE Research Reports are not intended to resolve the issues they identify or close any topic to further scrutiny Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2020006>
