

MAX HASTINGS

BOMBER COMMAND

"Bomber Command is a riveting and deeply original story of the bombing campaign against Hitler's Reich, a campaign of unimaginable horror for both the bomber crews and the enemy cities they turned to cinder and ash. It is a classic book, as fresh now as when it first published."

—Donald L. Miller, author of Masters of the Air: America's Bomber Boys Who Fought the Air War Against Nazi Germany

Bomber Command Zenith Military Classics:

Bomber Command Max Hastings, 2013-09-15 This award winning classic of WWII military history chronicles the Royal Air Force's bombing campaign against Germany. RAF Bomber Command's air offensive against the cities of Nazi Germany was one of the most epic campaigns of World War II. The struggle began meekly in 1939 with only a few aircraft: Whitleys, Hampdens and Wellingtons flying blindly through the night on their ill-conceived bombing runs. It ended six years later with 1,600 Lancasters, Halifaxes and Mosquitoes equipped with the best of British wartime technology blazing whole German cities in a single night. In *Bomber Command*, originally published to critical acclaim in the UK, famed British military historian Sir Max Hastings offers a captivating analysis of the strategy and decision making behind one of World War II's most violent episodes. With firsthand descriptions of the experiences of aircrew from 1939 to 1945 based on one hundred interviews with veterans and a harrowing narrative of the experiences of Germans on the ground during the September 1944 bombing of Darmstadt, *Bomber Command* is widely recognized as a classic account of one of the bloodiest campaigns in World War II history. Winner of the Somerset Maugham Prize. Bomber Command Max Hastings, Sir Max Hastings, 2013-09-09

DIV Bomber Command is Sir Max Hastings' classic account of one of the most controversial struggles of World War II: the British air offensive against the cities of Nazi Germany. **The 30 Most Influential People of World War II** Alan Axelrod, 2018-06-05 General Patton said: "The soldier is the army." This book says: "People are the war." And even World War II, a conflict of unprecedented scope, magnitude, complexity, and devastation, was the work of individual political leaders, commanders, heroes, and villains. Here are the 30 people who were at the very heart of the world's deadliest and most consequential war, exposed, studied, and ranked according to influence by an author praised as one of America's great military historians.

Torpedo Bombers, 1900-1950 Jean-Denis Lepage, 2020-01-27 The torpedo bomber was a very short-lived weapon system operational for scarcely half a century, from just prior to WWI to the 1960s. Yet during its brief existence, it transformed naval warfare, extending the ship-killing range of ships and coastal defenses to hundreds of miles. The Royal Navy and Fleet Air Arm led the way, recording the first sinking of a ship by aerial torpedo in August 1915, but all major navies eagerly developed their own torpedo bomber forces. The torpedo bomber reached its zenith in WWII, particularly from 1940-42, with notable successes at the Battle of Taranto, the sinking of the *Bismarck*, and Pearl Harbor. It was the weapon of choice for both the US and Japanese in the big Pacific battles, such as Midway. In the latter stages of the war, increasingly effective anti-aircraft fire and interceptor aircraft started to render it obsolete, a process completed post-war by long-range anti-ship missiles. Jean-Denis Lepage traces the development of torpedo bombers worldwide, describing their tactics, operational history, and the aircraft themselves, including such well-loved types as the *Swordfish*, *Beaufighter*, and *Avenger*. Over 300 aircraft are beautifully illustrated. *American Book Publishing Record*, 2006. *The Military's Business* Mikkel Vedby Rasmussen, 2015-03-05 Over recent years, Western armed forces have been costing more yet achieving less. Mikkel Vedby

Rasmussen draws on the ideas of business strategy to argue that Western militaries need to reform in order to become viable businesses which address relevant security issues within a realistic budget **Big Week** James Holland, 2022-03-30 A history of World War II's Operation Argument in which US and British air forces led a series of raids against Nazi Germany in 1944. During the third week of February 1944 the combined Allied air forces based in Britain and Italy launched their first round the clock bomber offensive against Germany. Their goal to smash the main factories and production centers of the Luftwaffe while also drawing German planes into an aerial battle of attrition to neutralize the Luftwaffe as a fighting force prior to the cross channel invasion planned for a few months later. Officially called Operation Argument this aerial offensive quickly became known as Big Week and it was one of the turning point engagements of World War II. In Big Week acclaimed World War II historian James Holland chronicles the massive air battle through the experiences of those who lived and died during it. Prior to Big Week the air forces on both sides were in crisis. Allied raids into Germany were being decimated but German resources fuel and pilots were strained to the breaking point. Ultimately new Allied aircraft especially the American long range P 51 Mustang and superior tactics won out during Big Week. Through interviews oral histories diaries and official records Holland follows the fortunes of pilots crew and civilians on both sides taking readers from command headquarters to fighter cockpits to anti aircraft positions and civilian chaos on the ground vividly recreating the campaign as it was conceived and unfolded. In the end the six days of intense air battles largely cleared the skies of enemy aircraft when the invasion took place on June 6 1944 D Day. Big Week is both an original contribution to WWII literature and a brilliant piece of narrative history recapturing a largely forgotten campaign that was one of the most critically important periods of the entire war. Praise for Big Week An Amazon Best Book of the Year. With the aid of diaries memoirs and his own interviews Mr Holland gives a detailed crewman's eye view of combat from inside the British American and German aircraft during the months leading up to Big Week and during the week itself. For those hoping for war movie stuff rest assured that the enemy fighters do come in at 6 o'clock the guns do hammer the sun does glint and the chutes do blossom in the sky. Still it's a serious and important story as well as a dramatic one and Mr Holland tells it with verve and authority. David A Price Wall Street Journal. Highly detailed. The interplay of personal stories with the broader strategic picture makes this book especially illuminating. A fascinating must read for World War II aficionados. Aerial Warfare Frank Ledwidge, 2018. Aerial warfare has dominated western war making for over 100 years and despite regular announcements of its demise it shows no sign of becoming obsolete. Frank Ledwidge offers a sweeping look at the history of air warfare introducing the major battles crises and controversies where air power has taken centre stage and the changes in technology and air power capabilities over time. Highlighting the role played by air power in the First and Second World Wars he also sheds light on the lesser known theatres where the roles of air forces have been clearly decisive in conflicts in Africa South America and Asia. Along the way Ledwidge asks key questions about the roles air power can deliver

and whether it is conceptually different from other forms of combat Considering whether bombing has ever been truly effective he discusses whether wars can be won from the air and concludes by analyzing whether there is a future for manned air power or if it is inevitable that drones will dominate twenty first century war in the air [Air Force Magazine](#),2015-07
