

Switching on/off

Press the button.

- On: the LED lights up.
- Off: the LED goes out.

The system can issue warnings at speeds above approx. 40 mph/65 km/h.

The state is stored for the remote control currently in use.

Display

- Lines, arrow 1: the system is activated.
- Arrows, arrow 2: at least one lane line was detected and warnings can be issued.

Issued warning

If you leave the lane and if a lane line has been detected, the steering wheel begins vibrating. If the turn signal is set before changing the lane, a warning is not issued.

End of warning

The warning ends:

- Automatically after approx. 3 seconds.
- When returning to your own lane.
- When braking hard.

- When using the turn signal.

System limits

Personal responsibility

The system cannot serve as a substitute for the driver's personal judgment of the course of the road and the traffic situation.

In the event of a warning, do not jerk the steering wheel, as you may lose control over the vehicle. ◀

The system may not be fully functional in the following situations:

- In heavy fog, rain or snowfall.
- In the event of worn, poorly visible, merging, diverging, or multiple lines such as in construction areas.
- When lane lines are covered in snow, ice, dirt or water.
- In tight curves or on narrow lanes.
- When the lines are covered by objects.
- When driving very close to the vehicle in front.
- When driving toward bright lights.
- When the windshield in front of the interior rearview mirror is fogged over, dirty or covered with stickers, etc.

Malfunctions

Steering wheel vibration

Frequent activation of the steering wheel vibration causes the system to overheat.

This causes the lane departure warning to become deactivated.

Let the system cool and reactivate it by pressing the button.
