

Biology Exam 1 Study Guide

Lecture 1 → Introduction to Biological Science

Tree of Life

- Domains
 - Eukarya → visible life
 - Split into animals and plants
 - Very small portion
 - Bacteria → single cell
 - Make up most of life's branches
 - Symbionts that evolved into mitochondria and chloroplasts were eubacteria
 - Archaea → original domain of life
 - More closely related to eukaryotes than eubacteria, first branch of life
 - Basic split between archaea and bacteria
- Candidate phyla radiation: Single species have been identified, each identifies an entire phylum which is yet to be understood - pioneer species (tree is dominated by new species that scientists have never seen before)
- Species disappearing faster than can be recovered
- Eukaryotes and archaea are most closely related branches

Destruction and Mass Extinction

- One million species face imminent extinction because of humans
- Recent past → >50% vertebrates/>75% flying insects lost in the past <50 years
- Critically threatened → >40% amphibians, >30% plants/corals/sharks, >25% mammals
- Populations and extinctions have increased

Theory of Evolution

- Evolution: all life on earth evolved from a common ancestor, most properties within cells work in the same way, the change in gene distribution over time within a population
- Theory: a very well substantiated idea that explains many overlapping phenomena at once, wide-ranging, strongest. Not a hypothesis
- Darwin: species arise through random mutation and natural selection for fitness
- Evidence (fewer than 40% of Americans believe in evolution)
 - fossil record shows conservation of homologous structures
 - Molecular proof: same DNA and RNA protein in cells
 - Homologous function in hands and fins → evolved similar mechanisms in appendages
- Scopes Monkey Trial
 - Scopes taught evolution illegally; resulted in Butler Act → forbid teaching evolution in TN
- Endosymbiont theory
 - Single composite cell of greater complexity could evolve from two or more separate simpler living cells in a symbiotic relationship

Year of Earth's History

- 1 Jan: earth formed 4.54 bya by acceleration of material from the solar nebula via gravitational collapse, conditions were incompatible with life, bombarded with asteroid-sized meteors for 800 million years
- 4 Mar: by 3.8 bya bombardment had slowed, Earth had cooled to lower the temps "compatible" with life

Applications of Service Learning in Higher Education Watson, Sandy White, 2024-03-22 In higher education a pressing issue has emerged how to authentically connect academic pursuits with real world challenges The last decade has witnessed an escalating call for heightened interaction between universities and the real world Demands have grown for higher education institutions to instill democratic citizenship and address students moral development In response to this rise in demand there has been a notable shift toward emphasizing service learning within academia As educators grapple with the imperative to seamlessly integrate theory and practice Applications of Service Learning in Higher Education steps into the forefront delving into the myriad applications of service learning to effectively address this critical issue

Applications of Service Learning in Higher Education examines the complexities surrounding service learning in higher education. At its core, the book aims to showcase concrete examples of successful service learning applications acting as a catalyst for the integration of this transformative pedagogy into the academic fabric. Beyond the surface, the book delves into the intricate planning, execution, and assessment stages of service learning projects, whether manifested within local communities or on an international scale. It seeks to fill notable knowledge gaps, particularly in less explored regions like Latin America and the Caribbean, and underscores the significance of multidisciplinary experiences. As the narrative unfolds, the book addresses the symbiotic relationship between service learning and students' programs of study, transforming communities into vibrant classrooms where learning transcends traditional boundaries.
