Aol Mail Update 2014:

Facebook Nation Newton Lee, 2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama in his 2011 State of the Union Address called America the nation of Edison and the Wright brothers and of Google and Facebook. U.S. Chief Information Officer Steven VanRoekel opines that America has become a Facebook nation that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness, a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that Facebook is the most appalling spying machine that has ever been invented. Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government, and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple Wood and Facebook ROI experts Dennis Yu and Alex Houg. **Scott on**

Scott, who practiced technology and business law for 29 years in Los Angeles and Silicon Valley, *Scott on Information Technology Law, Third Edition* offers a real-world perspective on how to structure transactions involving computer products and services such as software development, marketing, and licensing. He also covers the many substantive areas that affect technology law practice, including torts, constitutional issues, and the full range of intellectual property protections. You'll find coverage of the latest issues, like these: computer and cybercrime, including spyware, phishing, denial of service attacks, and more traditional computer crimes; the latest judicial thinking on software and business method patents; open source licensing; outsourcing of IT services; and the legal and practical issues involved in making it work and more. To help you quickly identify issues, the book also includes practice pointers and clause-by-clause analysis of the most common and often troublesome provisions of IT contracts. **Bulletin - U.S. Coast Guard Academy Alumni Association** United States Coast Guard Academy.
