Cognitive Kin, Moral Strangers? Linking Animal Cognition, Animal Ethics & Animal Welfare Judith

Benz-Schwarzburg, 2019-10-14 In *Cognitive Kin Moral Strangers* Judith Benz Schwarzburg reveals the scope and relevance of cognitive kinship between humans and non human animals She presents a wide range of empirical studies on culture language and theory of mind in animals and then leads us to ask why such complex socio cognitive abilities in animals matter Her focus is on ethical theory as well as on the practical ways in which we use animals Are great apes maybe better described as non human persons Should we really use dolphins as entertainers or therapists Benz Schwarzburg demonstrates how much we know already about animals capabilities and needs and how this knowledge should inform the ways in which we treat animals in captivity and in the wild

Following the Animal Ann-Sofie Lönngren, 2015-09-10 Literary transformations from human to animal have occurred in myths folklore fairy tales and narratives from all over the world since ancient times and have always provided a narrative space for depictions of power agency and the radical nature of change In *Following the Animal* these transformations are analysed with regards to their use in modern literature from northern most Europe with specific attention being paid to the insights they provide regarding the human animal relationship both generally in the industrialized West and against the background of more specific circumstances in the Nordic area In three analytic chapters focusing respectively on Swedish author August Strindberg's novel *Tschandala* 1887 Finnish author Aino Kallas's novel *The Wolf's Bride* 1928 and Danish author Karen Blixen Isak Dinesen's short story *The Monkey* 1934 along with discussions of a range of other authors and texts the reader is introduced to several traditions of literary production that both connect to and differ from Anglophone and other literature in fascinating ways In addition to the insights it provides concerning the uses of human animal transformations in modern Nordic literature and their significance in relation to the question of the animal *Following the Animal* also offers literary scholars and students alike a series of useable and transferable strategies for approaching texts from a more than anthropocentric human animal studies perspective In phrasing and employing the interpretational method of following the animal over the text's surface up metaphorical elevations down material wormholes and in constant dialogue with previous research this book contributes greatly to both human animal literary studies specifically and to the field of literary scholarship generally in both an international and northern European context

The Human-Animal Boundary Nandita Batra, Mario Wenning, 2018-11-27 Throughout the centuries philosophers and poets alike have defended an essential difference rather than a porous transition between the human and animal Attempts to assign essential properties to humans e g language reason or morality often reflected ulterior aims to defend a privileged position for humans This book shifts the traditional anthropocentric focus of philosophy and literature by combining the questions What is human and What is animal What makes this collection unique is that it fills a lacuna in critical animal studies and the growing field of ecocriticism It is the first collection that establishes a productive encounter between philosophical perspectives on the human animal boundary and those that draw on fictional literature The objective is to establish a dialogue between those disciplines with the goal of expanding the imaginative scope of human animal relationships The contributions thus do not only trace and deconstruct the boundaries dividing humans and nonhuman animals they also present the reader with alternative perspectives on the porous continuum and surprising reversal of what appears as human and what as nonhuman

Critical Perspectives on Veganism Jodey Castricano, Rasmus R. Simonsen, 2016-09-13 This book examines the ethics politics and aesthetics of veganism in contemporary culture and thought Traditionally a lifestyle located on the margins of western culture veganism has now been propelled into the mainstream and as agribusiness grows animal issues are inextricably linked to environmental impact as well as to existing ethical concerns This collection connects veganism to a range of topics including

gender sexuality race the law and popular culture It explores how something as basic as one's food choices continue to impact on the cultural political and philosophical discourse of the modern day and asks whether the normalization of veganism strengthens or detracts from the radical impetus of its politics With a Foreword by Melanie Joy and Jens Tuidor this book analyzes the mounting prevalence of veganism as it appears in different cultural shifts and asks how veganism might be rethought and re practised in the twenty first century

Animals, Empathy, and Anthropomorphism Carlo Salzani, 2025-05-05 This open access book explores the role of imagination in animal ethics and its constitutive links to empathy sympathy and anthropomorphism The book argues for the constitutive role of imagination in ethical deliberation but acknowledges that there exist important limits to its use However limit is here understood not merely negatively as restriction and insufficiency but rather positively as condition of possibility so what the book explores and analyses are the conditions for a positive and fruitful use of the imagination in ethics The book uses as a frame the questions and issues raised in J M Coetzee's *The Lives of Animals* to explore some central and salient themes
