Biology And Wildlife Of The Mediterranean Region:

Biology and Wildlife of the Mediterranean Region Jacques Blondel, James Aronson, 1999 The Mediterranean is an outstanding hot spot of biological diversity It is exceptional not only for this but also because of its long history of interactions between its human inhabitants and the other fauna and flora of the region The cradle of many civilizations the Mediterranean region has been host to humans for thousands of years This book is the first to synthesise our current understanding of the ecology biology and geology of Mediterranean animals birds and plants and their habitats The authors focus on the unique historical determinants and spatial patterns of Mediterranean biodiversity In particular the dramatic impacts of long term human activities on the region s landscapes flora and fauna are considered This fascinating story will be of interest to researchers and students in ecology biology conservation and geography as well as to naturalists and ecotourists visiting this popular holiday region

Defining Community in Early Modern Europe Michael Halvorson, Karen E. Spierling, 2008 Numerous historical studies use the term community to express or comment on social relationships within geographic religious political social or literary settings yet this volume is the first systematic attempt to collect together important examples of this varied work in order to draw comparisons and conclusions about the definition of community across early modern Europe The chapters demonstrate the complex and changeable nature of community in an era more often characterized as a time of stark certainties and inflexibility As a result the volume contributes a vital resource to the ongoing efforts of scholars to understand the creation and perpetuation of communities and the significance of community definition for early modern Europeans

Natural Heritage Peter Howard, Thymio Papayannis, 2013-10-18 It has become more and more accepted that nature conservation is not possible without taking into account human activities Thus an integrated approach to both the natural and cultural heritage is being encouraged and developed Gathering a number of distinguished authors with diverse backgrounds from a religious leader to academics to conservation scientists the book aims to investigate the relationship between human beings and nature between nature and culture Looking at nature as heritage of the human race is a recognition both of the tremendous impacts both positive and negative that human activities have had on the natural environment as well as the acceptance of human responsibility for managing our planet in a sustainable and sensitive manner The texts included examine this interface between human beings and nature in specific places from the Everglades in Florida and Mont Saint Michel in Atlantic France to the UK Europe and the Mediterranean as well as on a theoretical basis and in the context of the international biodiversity conventions

The Mediterranean Region Jacques Blondel, 2010-01-28 This is a detailed illustrated and up to date study of the fauna flora landscapes coastal areas and seascapes of the entire Mediterranean Basin and the Sea itself Since the publication of the first edition in 1999 the field has advanced in significant ways and this revision is timely
