Biomedicine Examined Culture Illness And Healing:

Biomedicine Examined M. Lock, D. Gordon, 1988-08-31 The culture of contemporary medicine is the object of investigation in this book the meanings and values implicit in biomedical knowledge and practice and the social processes through which they are produced are examined through the use of specific case studies The essays provide examples of how various facets of 20th century medicine including education research the creation of medical knowledge the development and application of technology and day to day medical practice are pervaded by a value system characteristic of an industrial capitalistic view of the world in which the idea that science represents an objective and value free body of knowledge is dominant The authors of the essays are sociologists and anthropologists in almost equal numbers also included are papers by a social historian and by three physicians all of whom have steeped themselves in the social sciences and humanities This cooperative endeavor which has necessitated the breaking down of disciplinary barriers to some extent is perhaps indicative of a larger movement in the social sciences one in which there is a searching for a middle ground between grand theory and attempts at universal explanations on the one hand and the context specific empiricism and relativistic accounts characteristic of many historical and anthropological analyses on the other *God's Laboratory* Elizabeth F. S.

Roberts, 2012-05-25 Assisted reproduction with its test tubes injections and gamete donors often raises important concerns regarding matters of life and kinship Yet these concerns do not take the same form everywhere around the world In this innovative ethnography of in vitro fertilization in Ecuador Elizabeth Roberts shows how having children through biotechnological intervention is not only tolerated it is embraced by the population despite widespread poverty and official condemnation by the Catholic Church Roberts takes us into clinics laboratories and homes providing a textured picture of the intimate **Biosocialities, Genetics and the Social Sciences** Sahra Gibbon, Carlos Novas, 2007-07-20 This pioneering

collection uses Paul Rabinow's concept of biosociality to chart the shifts in social relations and in ideas about nature biology and identity brought about by developments in biomedicine **Biomedicine Examined** M. Shattering Culture Mary-Jo DelVecchio Good, Sarah S. Willen, Seth Hannah, Ken Vickery, Lawrence Taeseng Park, 2011-11-01 Culture counts has long been a rallying cry among health advocates and policymakers concerned with racial disparities in health care A generation ago the women's health movement led to a host of changes that also benefited racial minorities including more culturally aware medical staff enhanced health education and the mandated inclusion of women and minorities in federally funded research Many health professionals would now agree that cultural competence is important in clinical settings but in what ways Shattering Culture provides an insightful view of medicine and psychiatry as they are practiced in today's culturally diverse clinical settings The book offers a compelling account of the many ways culture shapes how doctors conduct their practices and how patients feel about the care they receive Based on interviews with clinicians health care staff and patients Shattering Culture shows the human face of health care in America Building on over a decade of research led by Mary Jo Good the book delves into the cultural backgrounds of patients and their health care providers as well as the institutional cultures of clinical settings to illuminate how these many cultures interact and shape the quality of patient care Sarah Willen explores the controversial practice of matching doctors and patients based on a shared race ethnicity or language and finds a spectrum of arguments challenging its usefulness including patients who may fear being judged negatively by providers from the same culture Seth Hannah introduces the concept of cultural environments of hyperdiversity describing complex cultural identities Antonio Bullon and Mary Jo Good demonstrate how regulations meant to standardize the caregiving process such as the use of templates and check boxes instead of narrative notes have steadily limited clinician flexibility autonomy and the time they can dedicate to caring for patients Elizabeth Carpenter Song looks at positive doctor patient relationships in mental health care settings and finds that the most successful of these are based on mutual recognition patients who can express their concerns and clinicians who validate them In the book's final essay Hannah Good and Park show how navigating the maze of insurance regulations financial arrangements and paperwork compromises the effectiveness of mental health professionals seeking to

provide quality care to minority and poor patients Rapidly increasing diversity on one hand and bureaucratic regulations on the other are two realities that have made providing culturally sensitive care even more challenging for doctors Few opportunities exist to go inside the world of medical and mental health clinics and see how these realities are influencing patient care *Shattering Culture* provides a rare look at the day to day experiences of psychiatrists and other clinicians and offers multiple perspectives on what culture means to doctors staff and patients and how it shapes the practice of medicine and psychiatry

Managing Motherhood, Managing Risk Denise Allen, 2009-10-22 In *Managing Motherhood Managing Risk* Denise Roth Allen persuasively argues that development interventions in the Third World often have unintended and unacknowledged consequences Based on twenty two months of fieldwork in the Shinyanga Region of west central Tanzania this rich and engaging ethnography of women s fertility related experiences highlights the processes by which a set of seemingly well intentioned international maternal health policy recommendations go awry when implemented at the local level An exploration of how threats to maternal health have been defined and addressed at the global national and local levels *Managing Motherhood Managing Risk* presents two contrasting and oftentimes competing definitions of risk those that form the basis of international recommendations and national maternal health policies and those that do not The effect that these contrasting definitions of risk have on women s fertility related experiences at the local level are explored throughout the book This study employs an innovative approach to the analysis of maternal health risk one that situates rural Tanzanian women s fertility related experiences within a broader historical and sociocultural context Beginning with an examination of how maternal health risk was defined and addressed during the early years of British colonial rule in Tanganyika and moving to a discussion of an internationally conceived maternal health initiative that was launched on the world stage in the late 1980s the author explores the similarities in the language used and solutions proposed by health development experts over time This set of official maternal health risks is then compared to an alternative set of risks that emerge when attention is focused on women s experiences of pregnancy and childbirth at the local level Although some of these latter risks are often spoken about as deriving from spiritual or supernatural causes the case studies presented throughout the second half of the book reveal that the concept of risk in the context of pregnancy and childbirth is much more complex involving the interplay of spiritual physical and economic aspects of everyday life

Biomedical Entanglements Franziska A. Herbst, 2016-10-01 *Biomedical Entanglements* is an ethnographic study of the Giri people of Papua New Guinea focusing on the indigenous population s interaction with modern medicine In her fieldwork Franziska A Herbst follows the Giri people as they circulate within and around ethnographic sites that include a rural health center and an urban hospital The study bridges medical anthropology and global health exploring how the biomedical is imbued with social meaning and how biomedicine affects Giri ways of life

Good Quality Ayo Wahlberg, 2018-04-03 From its crude and uneasy beginnings thirty years ago Chinese sperm banking has become a routine part of China s pervasive and restrictive reproductive complex Today there are sperm banks in each of China s twenty two provinces the biggest of which screen some three thousand to four thousand potential donors each year Given the estimated one to two million azoospermic men those who are unable to produce their own sperm the demand remains insatiable China s twenty two sperm banks cannot keep up spurring sperm bank directors to publicly lament chronic shortages and even warn of a national sperm crisis jingzi weiji Good Quality explores the issues behind the crisis including declining sperm quality in the country due to environmental pollution as well as a chronic national shortage of donors In doing so Wahlberg outlines the specific style of Chinese sperm banking that has emerged shaped by the particular cultural juridical economic and social configurations that make up China s restrictive reproductive complex Good Quality shows how this high throughput style shapes the ways in which men experience donation and how sperm is made available to couples who can afford it
