Models and Techniques in Stroke Biology Amit Kumar Tripathi, Abhishek Kumar Singh, 2021-03-30 This book summarizes various tools and techniques used to provide insights into the cellular and molecular pathophysiology of stroke It also presents rodent animal models to help shed light on the pathophysiology of ischemic stroke Presenting the latest information on the different types of stroke including embolic filament photothrombotic and bilateral common carotid artery the book also describes techniques that are used for confirmation of stroke surgery such as laser speckle imaging LSI and laser Doppler flowmetry LDF and discusses the non human primates that are used in stroke surgery cerebral venous sinus thrombosis and neurobehavioral assessment Lastly it analyzes various neuroprotective agents to treat and prevent ischemic stroke and examines the challenges and advances in treating and preventing acute ischemic stroke **Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)** Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events *Microbial Co-cultures: A New Era of Synthetic Biology and Metabolic Engineering* Durgesh K. Jaiswal, Jay Prakash Verma, Tarun Belwal, Arthur Prudêncio De Araujo Pereira, Avinash Bapurao Ade, 2023-07-14 **Neuropathology of Drug Addictions and Substance Misuse Volume 3** Victor R Preedy, 2016-04-25 Neuropathology of Drug Addictions and Substance Misuse Volume 3 General Processes and Mechanisms Prescription Medications Caffeine and Areca Polydrug Misuse Emerging Addictions and Non Drug Addictions is the third of three volumes in this informative series and offers a comprehensive examination of the adverse consequences of the most common drugs of abuse Each volume serves to update the reader's knowledge on the broader field of addiction as well as to deepen understanding of specific addictive substances Volume 3 addresses prescription medications caffeine polydrug misuse and non drug addictions Each section provides data on the general molecular cellular structural and functional neurological aspects of a given substance with a focus on the adverse consequences of addictions Research shows that the neuropathological features of one addiction are often applicable to those of others and understanding these commonalities provides a platform for studying specific addictions in more depth and may ultimately lead researchers toward new modes of understanding causation prevention and treatment However marshalling data on the complex relationships between addictions is difficult due to the myriad of material and substances Offers a modern approach to understanding the pathology of substances of abuse offering an evidence based ethos for understanding the neurology of addictions Fills an existing gap in the literature by serving as a one stop shopping synopsis of everything to do with the neuropathology of drugs of addiction and substance misuse Includes in each chapter list of abbreviations abstract introduction applications to other addictions and substance misuse mini dictionary of terms summary points 6 figures and tables full references Offers coverage of preclinical clinical and population studies from the cell to whole organs and from the genome to whole body **Ultrasound for Precision Medicine: Diagnosis, Drug Delivery and Image-Guided Therapy**

Fei Yan, Jean Jose, Xiaobing Wang, 2020-08-07 Precision medicine is an approach that proposes customized medical care based on the individual characteristics of each patient. The rapidly emerging field not only holds great promise for diagnosis of disease and prediction of risk of developing diseases but also offers the possibility of remarkably fine tuned remedies to improve patient health while minimizing the risk of harmful side effects. Many technologies including genetics informatics and medical imaging are rapidly expanding the scope of precision medicine. Among these technologies imaging is poised to play a major role in the age of precision medicine. By characterizing anatomy physiology and metabolism of the patient medical imaging enables precise personalized procedures and predictive patient specific therapy selection. In recent years image guided treatment procedures are becoming more and more common in hospitals replacing conventional surgery or allowing faster recoveries with fewer post procedure complications. As the most widely used modality ultrasound is playing an increasingly important role towards moving precision medicine into clinical practice. It is a safe inexpensive diagnostic tool and capable of producing real time and non invasive images without significant biological effects. To date lots of ultrasound imaging technology such as gray scale color Doppler flow imaging CDFI contrast enhanced ultrasound CEUS elastography have been developed which have greatly improved disease diagnosis treatment and prognosis. Thanks to these progress ultrasound imaging has also been used in fields that were not previously involved such as the lungs and musculoskeletal tissues. With the rapid development of ultrasound contrast agents ultrasound molecular imaging is moving from animal study into clinical practice. First in human results of ultrasound molecular imaging with BR55 a kinase insert domain receptor KDR targeted contrast microbubble in patients with breast and ovarian lesions have been reported in 2017. Taking advantage of microbubble cavitation effect ultrasound assisted drug delivery technology also makes great progress. The clinical trial of blood brain barrier disruption for chemotherapy delivery in the brain had been conducted and confirmed its safety and well toleration in patients with recurrent glioblastoma GBM. Moreover ultrasound provides an advantageous tool for image guided therapy due to its capability of real time imaging for deep tissues contributing to greatly improved localization and targeting of diseased tissues. More interestingly by imaging these drug loaded contrast agents ultrasound mediated drug delivery can be visualized. All of the above examples help demonstrate the promising potential of ultrasound in precision medicine not only for disease diagnosis but also for treatment selection and prognosis evaluation. The present Research Topic here in Frontiers in Pharmacology aims to bring a collection of research describing ultrasound used for precision medicine in diagnosis drug delivery and image guided therapy.

Handbook of Cannabis and Related Pathologies Victor R Preedy, 2016-12-31 *Handbook of Cannabis and Related Pathologies* Biology Pharmacology Diagnosis and Treatment is the first book to take an interdisciplinary approach to the understanding of cannabis use and misuse. Recent worldwide trends toward decriminalizing marijuana for medical use have increased legal use of the drug and recreational use remains high making cannabis one of the most commonly used drugs. Cannabis has a wide range of adverse neurological effects and use and abuse can lead to physical

social and psychopathological issues that are multifarious and complex Effective understanding and treatment requires knowledge of the drug s effects from across scientific disciplines This book provides an overview of the biological and pharmacological components of the cannabis plant outlines its neurological social and psychopathological effects assists in the diagnosis and screening for use and dependency and aids researchers in developing effective treatments for cannabis related issues and disorders Fully illustrated with contributions from internationally recognized experts it is the go to resource for neuroscientists pharmacologists pathologists public health workers and any other researcher who needs an in depth and cross disciplinary understanding of cannabis and its effects Comprehensive chapters include an abstract key facts mini dictionary of terms and summary points Presents illustrations with at least six figures tables and diagrams per chapter Provides a one stop shopping synopsis of everything to do with cannabis and its related pathology from chemicals and cells individuals and communities and diagnosis and treatment Offers an integrated and informed synopsis of the complex issues surrounding cannabis as a substance its use and its misuse

Decision-making and economics of adaptation to climate change in the fisheries and aquaculture sector Watkiss, P.; Ventura, A.; Poulain, F.,2019-12-19 This publication reviews available information on the costs and benefits of climate change adaptation in the fisheries and aquaculture sector highlights the challenges in applying conventional appraisal and decision support tools to adaptation and reviews emerging frameworks including low regret actions addressing potential lock in and early planning for long term adaptation as well as economic tools to appraise adaptation options in fisheries and aquaculture

Competence Assessment in Education Detlev Leutner,Jens Fleischer,Juliane Grünkorn,Eckhard Klieme,2017-03-27 This book addresses challenges in the theoretically and empirically adequate assessment of competencies in educational settings It presents the scientific projects of the priority program Competence Models for Assessing Individual Learning Outcomes and Evaluating Educational Processes which focused on competence assessment across disciplines in Germany The six year program coordinated 30 research projects involving experts from the fields of psychology educational science and subject specific didactics The main reference point for all projects is the concept of competencies which are defined as context specific cognitive dispositions that are acquired and needed to successfully cope with certain situations or tasks in specific domains Koeppen et al 2008 p 62 The projects investigate different aspects of competence assessment The primary focus lies on the development of cognitive models of competencies complemented by the construction of psychometric models based on these theoretical models In turn the psychometric models constitute the basis for the construction of instruments for effectively measuring competencies The assessment of competencies plays a key role in optimizing educational processes and improving the effectiveness of educational systems This book contributes to this challenging endeavor by meeting the need for more integrative interdisciplinary research on the structure levels and development of competencies
