Biology Under The Influence Dialectical Essays On Ecology Agriculture And Health:

Biology Under the Influence; Dialectical Essays on Ecology, Agriculture and Health Biology Under the Influence, Richard Lewontin, Dialectical Essays on Ecology, Agriculture and Health, Richard Levins, 2009-01-01 Biology Under the Influence Richard C. Lewontin, 2007 Biology Under the Influence Richard Lewontin, Richard Levins, 2007-11-01 How do we understand the world While some look to the heavens for intelligent design others argue that it is determined by information encoded in DNA Science serves as an important activity for uncovering the processes and operations of nature but it is also immersed in a social context where ideology influences the questions we ask and how we approach the material world Biology Under the Influence Dialectical Essays on the Coevolution of Nature and Society breaks from the confines of determinism offering a dialectical analysis for comprehending a dynamic social and natural world In Biology Under the Influence Richard Lewontin and Richard Levins provide a devastating critique of genetic determinism and reductionism within science while exploring a broad range of issues including the nature of science biology evolution the environment public health and dialectics They dismantle the ideology that attempts to naturalize social inequalities unveil the alienation of science and nature and illustrate how a dialectical position serves as a basis for grappling with historical developments and a world characterized by change Biology Under the Influence brings together the illuminating essays of two prominent scientists who work to demystify and empower the public's understanding of science and nature **The Philosophical Foundations of Ecological Civilization** Arran Gare, 2016-08-05 The global ecological crisis is the greatest challenge humanity has ever had to confront and humanity is failing The triumph of the neo liberal agenda together with a debauched scientism has reduced nature and people to nothing but raw materials instruments and consumers to be efficiently managed in a global market dominated by corporate managers media moguls and technocrats The arts and the humanities have been devalued genuine science has been crippled and the quest for autonomy and democracy undermined The resultant trajectory towards global ecological destruction appears inexorable and neither governments nor environmental movements have significantly altered this or indeed seem able to The Philosophical Foundations of Ecological Civilization is a wide ranging and scholarly analysis of this failure This book reframes the dynamics of the debate beyond the discourses of economics politics and techno science Reviving natural philosophy to align science with the humanities it offers the categories required to reform our modes of existence and our institutions so that we augment rather than undermine the life of the ecosystems of which we are part From this philosophical foundation the author puts forth a manifesto for transforming our culture into one which could provide an effective global environmental movement and provide the foundations for a global ecological civilization **Global Rhetorics of Science** Lynda C. Olman, 2023-09-01 With this volume the field of rhetoric of science joins its sister disciplines in history and philosophy in challenging the dominance of Euro American science as a global epistemology The discipline of rhetoric understands world making and community building as interdependent activities that

is if we practice science differently we do politics differently and vice versa This wider aperture seems crucial at a time when we are confronted with the limitations of Euro American science and politics in managing global risks such as pandemics and climate change particularly in our most vulnerable communities The contributors to this volume draw on their familiarity with a wide range of global scientific traditions from Australian Aboriginal ecology to West African medicine to Polynesian navigation science to suggest possibilities for reconfiguring the relationship between science and politics to better manage global risks These possibilities should not only inspire scholars in rhetoric and technical communication but should also introduce readers from science and technology studies to some useful new approaches to the problem of decolonizing scenes of scientific practice around the world *Prolegomena to Any Future Materialism* Adrian Johnston, 2019-09-15 Adrian

Johnston's trilogy *Prolegomena to Any Future Materialism* aims to forge a thoroughly materialist yet antireductive theory of subjectivity In this second volume *A Weak Nature Alone* Johnston focuses on the philosophy of nature required for such a theory This volume is guided by a fundamental question How must nature be rethought so that human minds and freedom do not appear to be either impossible or inexplicable within it Asked differently How must the natural world itself be structured such that sapient subjects in all their distinctive peculiarities emerged from and continue to exist within this world In *A Weak Nature Alone* Johnston develops his transcendental materialist account of nature through engaging with and weaving together five main sources of inspiration Hegelian philosophy Marxist materialism Freudian Lacanian metapsychology Anglo American analytic neo Hegelianism and evolutionary theory and neurobiology Johnston argues that these seemingly but not really strange bedfellows should be brought together so as to construct a contemporary ontology of nature Through this ontology nonnatural human subjects can be seen to arise in an immanent bottom up fashion from nature itself **Ecological**

Crisis and Cultural Representation in Latin America Mark Anderson, Zélia M. Bora, 2016-10-04 Worldwide environmental crisis has become increasingly visible over the last few decades as the full scope of anthropogenic climate change manifests itself and large scale natural resource extraction has expanded into formerly remote areas that seemed beyond the reach of industrialization Scientists and popular culture alike have turned to the term Anthropocene to capture the global scale of environmental and even geological transformations that humans have carried out over the last two centuries The chapters in *Ecological Crisis and Cultural Representation in Latin America* examine the dynamics and interplay between local cultures and the expansion of global capitalism in Latin America emphasizing the role of art in bearing witness to and generating awareness of environmental and social crises but also its possibilities for formulating solutions They take particular care to draw out the ways in which local environmental crises in Latin American nations are witnessed and imagined as part of a global system focusing on the problems of time scale and complexity as key terms in conceiving the dimensions of crisis At the same time they question the notion of the Anthropocene as a species wide human historical project making visible the coloniality of natural resource extraction in Latin America and its dire effects for local people

cultures and environments Taking an ecocritical approach to Latin American cultural production including literature film performance and digital artwork the chapters in this volume develop a notion of ecological crisis that captures not only its documentary sense in the representation of environmental destruction the degradation of the oikos but also the crisis in the modern worldview logos that the acknowledgment of crisis provokes In this sense crisis is also the promise of a turning point of the possibilities for change Latin American representations of ecological crisis thus create the conditions for projects that decolonize environments developing new sustainable ways of conceiving of and relating to our world or returning to old ones

Immunological Discourse in Political Philosophy Inge Mutsaers, 2016-03-17 Given the propensity of contemporary protection measures such as counterterrorism efforts and fierce protection strategies against viral threats as well as physical and legal barriers against migration a number of political philosophers including Peter Sloterdijk and Roberto Esposito have claimed that contemporary political culture can be characterised by a so called immunisation paradigm This book critically examines the intricate entanglement between biological immunological notions and their political philosophical appropriation whilst studying the immunisation response to recent viral threats including the Swine Flu pandemic of 2009 and the lab bred Avian flu threat of 2012 to analyse immunisation as a biopolitical strategy Offering insights into to the polarising tendencies in contemporary political culture resulting from the appropriation of immunological concepts in political thought the author also shows how political philosophers tend to build on purely defensive understandings of immunity As such Immunological Discourse in Political Philosophy constitutes a theoretically sophisticated critique of the semantic trap caused by the use of immunological concepts in political philosophy Arguing for a more versatile and less defensive immunological repertoire which allows for the development of alternative and less polarised forms of political debate this book will appeal to scholars of political theory sociology philosophy and science and technology studies

Reducing Racial/Ethnic Disparities in Reproductive and Perinatal Outcomes Arden Handler, Joan Kennelly, Nadine Peacock, 2010-11-23 Among women s health concerns reproductive issues both prenatal and postpartum hold particular prominence Yet despite the many programs dedicated to improving women s reproductive health maternal and infant morbidity and mortality rates in minority communities remain unchanged or have increased Confronting this alarming statistic head on Reducing Racial Ethnic Disparities in Reproductive and Perinatal Outcomes is the first book systematically examining public health interventions designed toward meeting this important and elusive goal Its contributors offer the best thinking and practice on this complicated topic clarifying the relationship between evidence based medicine and evidence based public health and its potential for increasing parity considering interventions in the multiple contexts of women s lives reviewing the evidence base for each program or initiative featured and describing methodologies for evaluating interventions The resulting volume advocates for an integrative lifespan approach including topics related to Family planning STI and HIV AIDS screening and treatment Smoking cessation and reducing exposure to environmental smoke Preconceptional well woman care Depression

screening and treatment Labor delivery approaches and intrapartum care Emerging prenatal care interventions from centering pregnancy to doula support For professionals and graduate students in psychiatry psychology sociology women s health and public health Reducing Racial Ethnic Disparities in Reproductive and Perinatal Outcomes reframes a set of ongoing issues and guides the reader toward state of the art solutions *Handbook of Cities and the Environment* Kevin Archer,Kris Bezdecny,2016-12-30 With an ever growing majority of the world s human population living in city spaces the relationship between cities and nature will be one of the key environmental issues of the 21st Century This book brings together a diverse set of authors to explore the various aspects of this relationship both theoretically and empirically Rather than considering cities as wholly separate from nature a running theme throughout the book is that cities and city dwellers should be characterized as intrinsic in the creation of specifically urban generated socio natures
