

PreK–Grade 2

Children spend a lot of time with all kinds of ideas about numbers, shapes, measuring tools, time, and money—ideas formed from the experiences they have while using the things they see in their lives—the computer screen, the children's books, all around them. It is no wonder some children develop very interesting and perhaps incorrect ideas about mathematical concepts.

It is not to remove the informal knowledge that students bring to our classrooms with the mathematics program adopted by our school system just as important, but it is to ensure that the mathematics we are introducing and reinforcing is accurate and will not need to be brought to "last year."

This companion resource to *Math Misconceptions* answers these questions by providing explicit instructional ideas and engaging activities that can be implemented in any classroom. Aligned with the NCTM standards, *Activities to Undo Math Misconceptions, PreK–Grade 2*:

- addresses the most common errors found in each of the five NCTM content strands
- offers numerous instructional ideas ("What If?") for correcting misconceptions and preventing misconceptions from taking root
- includes 100 activities, more than 50 activities and games that can be immediately incorporated into your classroom instruction
- helps guide your formative assessment with suggested "Look For's" as students work through the activities

The downloadable resources include editable versions of the 100 activities in both English and Spanish, allowing you to customize the activities for your particular classroom.

Through your students' math misconceptions, this practical, student resource will help make it all make sense and make math achievement in your classroom.
