the Education Divide Using Social Technologies Somprakash Bandyopadhyay, Arina Bardhan, Priyadarshini Dey, Sneha Bhattacharyya, 2021-02-06 This book explains the concept of education divide in rural India and identifies various factors that shape and sustain such a divide. In doing so, it also discusses a range of attempts undertaken to bridge the education divide. Subsequently, the book has attempted in providing a socio-technical framework towards optimally deploying social technologies for addressing the issue of education divide of marginalized communities. The proposed framework offers a transition from traditional content-centric, teacher-centric and centralized education ecosystem to a connection-centric, learner-centric and decentralized education ecosystem of the socio-digital age. It demonstrates how Internet-enabled digital platforms based on the principles of sharism and mass collaboration using social technologies could help to solve one of the greatest problems facing the world: mitigating the extant education divide by delivering quality education to underprivileged sections of society. The book also presents empirical validation of the proposed framework to show how a community-driven blended learning platform can mobilize the dormant knowledge capital of domain experts to teach underprivileged rural Indian children as well as help form communities of practice to enable lifelong learning for the rural adult population. The book closes by pointing out the challenges involved in building an equitable education ecosystem using social technologies and ultimately the possibility of creating a fair and equitable society. Given its scope, the book offers a valuable resource for researchers, policymakers and practitioners in the domain of education who want to transform education ecosystems by using technological and process-related innovations to improve educational practices for underprivileged sections of society.

Challenges and Solutions When Using Technologies in the Classroom Amy M. Johnson, Matthew E. Jacovina, Devin G. Russell, Christian M. Soto, 2016 The purpose of this chapter is to present common challenges faced by educators when attempting to integrate technology in the classroom and offer potential solutions to those problems. Examination of these issues should be valuable to current and future educators, school administrators as well as educational technology researchers. The chapter begins by introducing the challenges to technology integration that are external/extrinsic to the teacher, including access to resources, training and support. We then present barriers that are internal to teachers, including their attitudes and beliefs, resistance toward technology in the classroom and their knowledge and skills. The next section presents international perspectives on the technology integration problem, focusing on a case in Chile. The chapter concludes with a short summary of the chapter and condensed recommendations for effective technology implementation. This paper was published in S. A. Crossley, D. S. McNamara (Eds.), *Adaptive educational technologies for literacy instruction*, pp. 13-29. New York: Taylor & Francis.
