Addiction Crime And Insurgency Addiction Crime And Insurgency:

Transnational Crime and Global Security Philip L. Reichel, Ryan Randa, 2018-01-12 This two volume work offers a comprehensive examination of the distressing topics of transnational crime and the implications for global security National security is a key concern for individual nations regions and the global community yet globalism has led to the perfusion of transnational crime such that it now poses a serious threat to the national security of governments around the world Whether attention is concentrated on a particular type of transnational crime or on broader concerns of transnational crime generally the security issues related to preventing and combatting transnational crime remain of top priority concern for many governments Transnational Crime and Global Security has been carefully curated to provide students scholars professionals and consultants of criminal justice and security studies with comprehensive information about and in depth analysis of contemporary issues in transnational crime and global security The first volume covers such core topics as cybercrime human trafficking and money laundering and also contains infrequently covered but nevertheless important topics including environmental crime the weaponization of infectious diseases and outlaw motorcycle gangs The second volume is unique in its coverage of security issues related to such topics as the return of foreign terrorist fighters using big data to reinforce security and how to focus efforts that encourage security cooperation Organized Crime Klaus von Lampe, 2015-07-16

Organized Crime Analyzing Illegal Activities Criminal Structures and Extra legal Governance provides a systematic overview of the processes and structures commonly labeled organized crime drawing on the pertinent empirical and theoretical literature primarily from North America Europe and Australia The main emphasis is placed on a comprehensive classificatory scheme that highlights underlying patterns and dynamics rather than particular historical manifestations of organized crime Esteemed author Klaus von Lampe strategically breaks the book down into three key dimensions 1 illegal activities 2 patterns of interpersonal relations that are directly or indirectly supporting these illegal activities and 3 overarching illegal power structures that regulate and control these illegal activities and also extend their influence into the legal spheres of society Within this framework numerous case studies and topical issues from a variety of countries illustrate meaningful application of the conceptual and theoretical discussion *Professional Journal of the United States Army*, 2013 *Combined Arms Center (CAC) Research and Publication Index*, 2011 Index to selected publications of the Combined Arms Center

European Peace and Security Policy Michael Brzoska, 2015-03-26 After the attacks of 9 11 terrorism and other forms of transnational risks of violence dominated official security policy Researchers at the Institute for Peace Research and Security Policy at the University of Hamburg investigated the consequences of this change for security governance in a multi annual research program Case studies show that transnational security policies changed but that national governments remained dominant In other words the transnationalisation of threat perceptions only led to a limited internationalisation of security policies The volume presents results of the research program It combines conceptual work on security governance

with empirical research for instance on counterterrorism changing perceptions of security in international organizations such as the European Union and the Organization for Security and Co operation in Europe

Addiction, Crime and Insurgency, 2009 Global opium production increasingly shifted from South East Asia to Afghanistan during the 1990s This trend increased in the first decade of the twenty first century to the point that Afghanistan s supply of opium exceeded world demand Afghanistan is now the source for more than 90 per cent of the world s deadliest drug The Afghan drug trade spreads crime corruption addiction and HIV It is a major source of revenue for insurgents criminals and terrorists It undermines governance public health and public security within Afghanistan and along trafficking routes In short it poses a major transnational threat to health and security The report reveals how the flows of Afghan opiates are distributed in the world and the extent to which regional insurgency or instability is fuelled by the Afghan opiate industry

Maonomics Loretta Napoleoni, 2011-10-11 The end of the cold war was thought to signal the triumph of Western capitalism over Communism In *Maonomics* Why Chinese Communists Make Better Capitalists than We Do Napoleoni argues just the opposite what we are witnessing instead is the beginning of the collapse of capitalism and the victory of communism with a profit motive *Maonomics* charts the prodigious ascent of the Chinese economic miracle and the parallel course of the West s ongoing insistence on misconstruing China and its economy even as we acknowledge its growing influence and importance *Maonomics* is a warning call whereby Western governments can avoid economic collapse by learning how to understand more clearly what the lessons of the Chinese economy really are Based on first hand reporting from China during frequent visits in the last several years *Maonomics* lends credence to the Chinese view and translates it for Western readers For example the Chinese too are attached to their vision of democracy but it is different from ours It isn t focused as much on voting as it is economic opportunity and the fair distribution of wealth and prosperity Napoleoni also separates failed Leninist political ideology from true Marxist theory showing that Marx s writings do not reject profit so long as it is used to benefit the people Marx s dictatorship of the proletariat is being realized in China she argues where giant steps forward are being made in the name of progress and the wellbeing and prosperity of the Chinese people Looking at the Chinese economy up close any economist would be hard pressed to say that they are not on the right track Here Loretta Napoleoni offers a front row seat on the greatest show on earth the peaceful economic revolution that is shifting the balance of power in the world from West to East

Anti-Corruption Strategies in Fragile States Jesper Johnson, 2016-11-25 Aid agencies increasingly consider anti corruption activities important for economic development and poverty reduction in developing countries In the first major comparative study of work by the World Bank the European Commission and the UNDP to help governments in fragile states counter corruption Jesper Johnson finds significant variance in strategic direction and common failures in implementation

Draining development? Peter Reuter, 2012-02-01 A growing concern among those interested in economic development is the realization that hundreds of billions of dollars are illicitly flowing out of developing countries to tax

havens and other financial centers in the developed world This volume assesses the dynamics of these flows much of which is from corruption and tax evasion

The Rule of Law in Afghanistan Whit Mason, 2011-04-14

How despite the enormous investment of blood and treasure has the West's ten year intervention left Afghanistan so lawless and insecure The answer is more insidious than any conspiracy for it begins with a profound lack of understanding of the rule of law the very thing that most dramatically separates Western societies from the benighted ones in which they increasingly intervene This volume of essays argues that the rule of law is not a set of institutions that can be exported lock stock and barrel to lawless lands but a state of affairs under which ordinary people and officials of the state itself feel it makes sense to act within the law Where such a state of affairs is absent as in Afghanistan today brute force not law will continue to rule
