O. E. WILLIAMSON, 2018-07-02 Learn After Effects Scripts After Effects scripts are coded tools to automate processes that would be too tedious to do manually such as bulk renaming layers shifting certain shape layers importing text from a spreadsheet file or organizing your project structure In essence scripts can do the manual tasks you can do except faster It cannot do things you cannot do yourself plugins which are basically individual software within After Effects can do this In this article I will point you to all the resources you ll need to get started with scripting for Adobe products specifically After Effects scripting without having any knowledge of programming so the learning curve was pretty steep If you re familiar with programming at all even if you ve taken a single intro course in school you should be more than sufficient Adobe apps use a language called ExtendScript which is just a modified version of JavaScript so if you re into web development you

should feel right at home The process is not that vigorous once you have the fundamental programming concepts down like arrays objects functions recursions etc Best of luck on your scripting adventures After Effects scripts like expressions can be intimidating The code nature of these functions is often enough to make creative professionals shy away I m a motion designer not a programmer but don t be afraid When you start to understand the fundamentals of scripts in After Effects you ll see that it s not as complicated as you may have assumed This BOOK will help get you started **Real World Adobe**
