Advances in Neural Networks Research D.C. Wunsch II,M. Hasselmo,K. Venayagamoorthy,D. Wang,2003-08-22 IJCNN is the flagship conference of the INNS as well as the IEEE Neural Networks Society It has arguably been the preeminent conference in the field even as neural network conferences have proliferated and specialized As the number of conferences has grown its strongest competition has migrated away from an emphasis on neural networks IJCNN has embraced the proliferation of spin off and related fields see the topic list below while maintaining a core emphasis befitting its name It has also succeeded in enforcing an emphasis on quality

PRICAI 2000 Topics in Artificial Intelligence Riichiro Mizoguchi,John Slaney,2007-12-07 PRICAI 2000 held in Melbourne Australia is the sixth Pacific Rim International Conference on Artificial Intelligence and is the successor to the five earlier PRICAIs held in Nagoya Japan Seoul Korea Beijing China Cairns Australia and Singapore in the years 1990 1992 1994 1996 and 1998 respectively PRICAI is the leading conference in the Pacific Rim region for the presentation of research in Artificial Intelligence including its applications to problems of social and economic importance The objectives of PRICAI are To provide a forum for the introduction and discussion of new research results concepts and technologies To provide practising engineers with exposure to and an evaluation of evolving research tools and practices To provide the research community with exposure to the problems of practical applications of AI and To encourage the exchange of AI technologies and experience within the Pacific Rim countries PRICAI 2000 is a memorial event in the sense that it is the last one in the 20 century It reflects what researchers in this region believe to be promising for their future AI research activities In fact some salient features can be seen in the papers accepted We have 12 papers on agents while PRICAI 96 and 98 had no more than two or three This suggests to us one of the directions in which AI research is going in the next century It is true that agent research provides us with a wide range of research subjects from basic ones to applications

Artificial Neural Networks Kevin L. Priddy,Paul E. Keller,2005 This tutorial text provides the reader with an understanding of artificial neural networks ANNs and their application beginning with the biological systems which inspired them through the learning methods that have been developed and the data collection processes to the many ways ANNs are being used today The material is presented with a minimum of math although the mathematical details are included in the appendices for interested readers and with a maximum of hands on experience All specialized terms are included in a glossary The result is a highly readable text that will teach the engineer the guiding principles necessary to use and apply artificial neural networks

Innovations in ART Neural Networks Beatrice Lazzerini, Ugur Halici, 2013-06-05 In the last two decades the artificial neural networks have been refined and widely used by the researchers and application engineers We have not witnessed such a large degree of evolution in any other artificial neural network as in the Adaptive Resonance Theory ART neural network The ART network remains plastic or adaptive in response to significant events and yet remains stable in response to irrelevant events This stability plasticity property is a great step towards realizing intelligent machines capable of autonomous learning in real time environment The main aim of this book is to report a very small sample of the research on the evolution of ART neural network and its applications Interested readers may refer literature for many more innovations in ART such as Fuzzy ART ART2 ART2 a ARTMAP ARTMAP PI ARTMAP DS Gaussian ARTMAP EXACT ART and ART EMAP

Lafayette IN USA Background and Motivation The basic notion of artificial neural networks ANNs as we understand them today was perhaps first formalized by McCulloch and Pitts 1943 in their model of an artificial neuron Research in this field remained somewhat dormant in the early years perhaps because of the limited capabilities of this method and because there was no clear indication of its potential uses However interest in this area picked up momentum in a dramatic fashion with the works of Hopfield 1982 and Rumelhart et al 1986 Not only did these studies place artificial neural networks on a firmer mathematical footing but also opened the door to a host of potential applications for this computational tool Consequently neural network computing has progressed rapidly along all fronts theoretical development of different learning algorithms computing capabilities and applications to diverse areas from neurophysiology to the stock market Initial studies on artificial neural networks were prompted by a desire to have computers mimic human learning As a result the jargon associated with the technical literature on this subject is replete with expressions such as excitation and inhibition of neurons strength of synaptic connections learning rates training and network experience ANNs have also been referred to as neurocomputers by people who want to preserve this analogy
