Criminalising Cartels Caron Beaton-Wells, Ariel Ezrachi, 2011-02-10 This book is inspired by the international movement towards the criminalisation of cartel conduct over the last decade Led by US enforcers criminalisation has been supported by a growing number of regulators and governments It derives its support from the simple yet forceful proposition that criminal sanctions particularly jail time are the most effective deterrent to such activity However criminalisation is much more complex than that basic proposition suggests There is complexity both in terms of the various forces that are driving and shaping the movement economic political and social and in the effects on the various actors involved in it government enforcement agencies the business community judiciary legal profession and general public Featuring contributions from authors who have been at the

forefront of the debate around the world this substantial 19 chapter volume captures the richness of the criminalisation phenomenon and considers its implications for building an effective criminal cartel regime particularly outside of the US It adopts a range of approaches including general theoretical perspectives from criminal theory economics political science regulation and criminology and case studies of the experience with the design and enforcement of existing or contemplated criminal cartel regimes in various jurisdictions including in Australia Canada EU Germany Ireland and the UK The book also explores the international dimensions of criminalisation its specific practical consequences such as increased potential for extradition as well as its more general implications for trends of harmonisation or convergence in competition law and enforcement

Regulating Competition Susanna Fellman, Martin Shanahan, 2015-12-22 Cartels trusts and agreements to reduce competition between firms have existed for centuries but became particularly prevalent toward the end of the 19th century In the mid 20th century governments began to use so called cartel registers to monitor and regulate their behaviour This book provides cases studies from more than a dozen countries to examine the emergence application and eventual decline of this form of regulation Beginning with a comparison of the attitudes to regulation that led to monitoring rather than prohibiting cartels this book examines the international studies on cartels undertaken by the League of Nations before World War II This is followed by a series of studies on the context of the registers including the international context of the European Union and the importance of lobby groups in shaping regulatory outcomes using Finland as an example Section two provides a broad international comparison of several countries registers with individual studies on Norway Australia Japan Germany Sweden and the Netherlands After examining the impact of registration on business behaviour in the insurance industry this book concludes with an overview of the lessons to be learnt from 20th century efforts to regulate competition With a foreword by Harm Schroter this book outlines the rise and fall of a system that allowed nations to tailor their approach to regulating competition to their individual circumstances whilst also responding to the pressures of globalisation that emerged after the Second World War This book is suitable for those who are interested in and study economic history international economics and business history Chapter 10 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Corporate Criminality and Liability for Fraud Alison Cronin, 2018-03-14 Through a rational reconstruction of orthodox legal principles and reference to cutting edge neuro science this book reveals some startling truths about the criminal law its history and the fundamental doctrines that underpin the attribution of criminal fault While this has important implications for the criminal law generally the focus of this work is the development of a theory of corporate criminality that accords with modern theory of group agency itself informed by advancements in contemporary philosophy and social science The innovation it proposes is the theoretical and practical means by which criminal fault can be attributed directly to the corporate actor where liability cannot or should not be reduced to its individual members

Legal Regulation of Corporate Social Responsibility Mia Mahmudur Rahim, 2013-11-27 Even though Corporate Social Responsibility CSR has become a widely accepted concept promoted by different stakeholders business corporations internal strategies known as corporate self regulation in most of the weak economies respond poorly to this responsibility Major laws relating to corporate regulation and responsibilities of these economies do not possess adequate ongoing influence to insist on corporate self regulation to create a socially responsible corporate culture This book describes how the laws relating to CSR could contribute to the inclusion of CSR principles at the core of the corporate self regulation of these economies in general without being intrusive in normal business practice It formulates a meta regulation approach to law particularly by converging patterns of private ordering and state control in contemporary corporate law from the perspective of a weak economy It proposes that this approach is suitable for alleviating regulators limited access to information and expertise inherent limitations of prescriptive rules ensuring corporate commitment and enhance the self regulatory capacity of companies This book describes various meta regulation strategies for laws to link social values to economic incentives and disincentives and to indirectly influence companies to incorporate CSR principles at the core of their self regulation strategies It investigates this phenomenon using Bangladesh as a case study
