Introduction to Internet

Gilad James, PhD, The Internet is a global network of interconnected devices and communication systems that enables individuals to access a wide range of information and resources from anywhere in the world The origins of the Internet can be traced back to the 1960s when the US Department of Defense created a network of computers to exchange information and facilitate communication among researchers and scientists This network known as ARPANET became the foundation for the Internet as we know it today Over the past few decades the Internet has undergone a remarkable transformation becoming an essential tool for communication commerce education and entertainment The advent of the web in the 1990s marked a major milestone in the evolution of the Internet as it enabled individuals to publish and access information in a decentralized manner Today the Internet is an ever expanding ecosystem that comprises billions of websites social media platforms e commerce sites online communities and more all of which are powered by advanced technologies and infrastructure that enable quick reliable access to information and services

Advanced Internet Based Systems and Applications Ernesto Damiani,Kokou Yetongnon,Richard Chbeir,Albert Dipanda,2009-04-24 In recent years Internet based systems and applications have become pervasive and have been the focus of many ongoing research efforts They range from semi structured information to multimedia systems and applications to P2P and ad hoc information sharing networks and service centric systems and applications This book presents a collection of articles from the best papers presented at the SITIS 2006 International Conference aiming to cover recent advanced research on distributed information systems including both theoretical and applied solutions This volume is designed for a professional audience practitioners and researchers in industry It is also suitable as a reference or secondary text for advanced level students in computer science and engineering The articles in this book are a selection of papers presented at the IMRT and WITDS tracks of the international SITIS 2006 conference The authors were asked to revise and extend their contributions to take into account the comments and discussions made at the conference A large number of high quality papers were submitted to SITIS 2006 demonstrating the growing interest of the search community for Internet Based and multimedia information systems We would like to acknowledge the hard work and dedication of many people Our deepest gratitude goes to the authors who contributed their work We appreciate the diligent work of the SITIS Committee members We are grateful for the help support and patience of the LNCS publishing team Finally thanks to Iwayan Wikacsana for his invaluable help February 2007 Ernesto Damiani Kokou Yetongnon Richard Chbeir Albert Dipanda
