Kinematics Jadran Lenarčič, Vincenzo Parenti Castelli, 2012-12-06 The articles of this book were reported and discussed at the fifth international symposium on Advances in Robot Kinematics As is known the first symposium of this series was organised in 1988 in Ljubljana The following meetings took place every other year in Austria Italy and Slovenia Linz Ferrara Ljubljana Portoroz Bernardin It must be emphasised that the symposia run under the patronage of the International Federation for the Theory of Machines and Mechanisms IFToMM In this period Advances in Robot Kinematics has been able to attract the most outstanding authors in the area and also to create an optimum combination of a scientific pragmatism and a friendly atmosphere Hence it has managed to survive in a strong competition of many international conferences and meetings In the most ancient way robot kinematics is regarded as an application of the kinematics of rigid bodies However there are topics and problems that are typical for robot kinematics that cannot easily be found in any other scientific field It is our belief that the initiative of Advances in Robot Kinematics has contributed to develop a remarkable scientific community The present book is of interest to researchers doctoral students and teachers engineers and mathematicians specialising in kinematics of robots and mechanisms mathematical modelling simulation design and control of robots *Advances in Robot Kinematics: Motion in Man and Machine* Jadran Lenarčič, Michael M.
