Graft Preservation Dawn Bowles, Jamshid Karimov, Cristiano

Amarelli,2024-12-31 Recently solid organ transplant outcomes have benefited from improvements in graft preservation strategies The use of ex vivo machine perfusion for organ has increased the donor pool and extended criteria for donor organs that would have previously been excluded from transplantation Utilization of machine perfusion has protected donor organs from the injuries traditionally encountered by static cold storage minimized rates of primary graft dysfunction and even allowed for recovery of the function of marginal organs Machine perfusion has also extended preservation periods well beyond what is considered acceptable after static cold storage for kidney liver lung and hearts The extended preservation time plus the growing use of ex vivo machine perfusion during organ procurement has introduced the potential for administering therapeutics during this period to improve organ quality and mitigate post transplantation complications The types of therapeutics that can be administered range from traditional pharmaceuticals to advanced therapeutics such as gene and cell therapy The primary objective of this research topic is to collect opinions original research articles clinical translational basic case reports and reviews both brief and expansive that address gaps in knowledge in field of graft preservation as well as applications of ex vivo perfusion

Coding Properties in Invertebrate Sensory Systems Sylvia Anton,Anders Garm,Berthold G. Hedwig,2017-03-07 Animals rely on sensory input from their environment for survival and reproduction Depending on the importance of a signal for a given species accuracy of sensory coding might vary from pure detection up to precise coding of intensity quality and temporal features of the signal Highly sophisticated sense organs and related central nervous sensory pathways can be of utmost importance for animals in a complex environment and when using advanced communication systems In sensory systems different anatomical and physiological features have evolved to optimally encode behaviourally relevant signals at the level of sense organs and central processing The wide range of organizational complexity in combination with their relatively simple and accessible nervous systems makes invertebrates excellent models to study general sensory coding principles The contributions to this e book illustrate on one hand particular features of specific sensory systems and on the other hand indicate not only common features of sensory coding across invertebrate phyla but also similar processing principles of complex stimuli between different sensory modalities The chapters show that the extraction of behaviourally relevant signals from all environmental stimuli as well as the detection of low intensity signals and the analysis of temporal features can be similar across sensory modalities including olfaction vision mechanoreception and heat perception

Dioxin Sudarshan Kurwadkar,Prabir Mandal,Shivani Soni,2020-01-20 Dioxin Environmental Fate and Health Ecological Consequences offers a unique and comprehensive coverage of dioxins and their congeners once they are released to the environment The book provides readers with a systematic understanding of past and emerging sources of dioxins current dioxins inventories and historical trends fate and long range transboundary atmospheric transport human health and ecological risk and regulatory perspective Providing an excellent analysis of dioxin exposure through the food chain and impact on human health it also documents the environmental implications of dioxins on ecological

flora and fauna The book offers readers a holistic understanding about dioxins their atmospheric fate and transport distribution in various environmental matrices and various routes and exposure pathways through which human beings are exposed to this persistent organic pollutant It further offers an insight into the toxicological profile and mechanistic analysis of the onset of cancer remediation technologies and existing regulatory framework to deal with the problems associated with dioxins The book will serve as an excellent resource to environmental professionals particularly environmental toxicologists environmental health professionals remediation engineers environmental regulatory agencies policymakers and environmental law professionals The Comparative Psychology of Intelligence: Macphail Revisited Michael Colombo,Damian Scarf,Thomas Zentall,2021-03-15
