Andrzej Mostowski And Foundational Studies Stand Alone:

Andrzej Mostowski and Foundational Studies Andrzej Ehrenfeucht, Wiktor Marek, Marian Srebrny, 2008 Andrzej Mostowski was one of the leading 20th century logicians This volume examines his legacy devoted both to his scientific heritage and to the memory of him as a great researcher teacher organizer of science and person It includes the bibliography of Mostowski s writings **Andrzej Mostowski and Foundational Studies** A. Ehrenfeucht, Andrzej Ehrenfeucht, V.W. Marek, M. Srebrny, 2008-03-06 Andrzej Mostowski was one of the leading 20th century logicians This volume examines his legacy devoted both to his scientific heritage and to the memory of him as a great researcher teacher organizer of science and person It includes the bibliography of Mostowski s writings **Andrzej Mostowski and Foundational Studies** Andrzej Ehrenfeucht, Wiktor Marek, Marian Srebrny, 2013 **Foundational Studies Selected Works** Lev D. Beklemishev, 2000-04-01 Foundational Studies Selected Works Foundational Studies Lev D. Beklemishev, 2000-04-01 Foundational Studies Feferman on Foundations Gerhard Jäger, Wilfried Sieg, 2018-04-04 This volume honours the life and work of Solomon Feferman one of the most prominent mathematical logicians of the latter half of the 20th century In the collection of essays presented here researchers examine Feferman s work on mathematical as well as specific methodological and philosophical issues that tie into mathematics Feferman s work was largely based in mathematical logic namely model theory set theory proof theory and computability theory but also branched out into methodological and philosophical issues making it well known beyond the borders of the mathematics community With regard to methodological issues Feferman supported concrete projects On the one hand these projects calibrate the proof theoretic strength of subsystems of analysis and set theory and provide ways of overcoming the limitations imposed by Gödel s incompleteness theorems through appropriate conceptual expansions On the other they seek to identify novel axiomatic foundations for mathematical practice truth theories and category theory In his philosophical research Feferman explored questions such as What is logic and proposed particular positions regarding the foundations of mathematics including for example his conceptual structuralism The contributing authors of the volume examine all of the above issues Their papers are accompanied by an autobiography presented by Feferman that reflects on the evolution and intellectual contexts of his work The contributing authors critically examine Feferman s work and in part actively expand on his concrete mathematical projects The volume illuminates Feferman s distinctive work and in the process provides an enlightening perspective on the foundations of mathematics and logic **Hilbert s Program** M. Detlefsen, 2013-03-09 Hilbert s Program was founded on a concern for the phenomenon of paradox in mathematics To Hilbert the paradoxes which are at once both absurd and irresistible revealed a deep philosophical truth namely that there is a discrepancy between the laws according to which the mind of homo mathematicus works and the laws governing objective mathematical fact Mathematical epistemology is therefore to be seen as a struggle between a mind that naturally works in one way and a reality that works in another Knowledge occurs when the two

cooperate Conceived in this way there are two basic alternatives for mathematical epistemology a skeptical position which maintains either that mind and reality seldom or never come to agreement or that we have no very reliable way of telling when they do and a non skeptical position which holds that there is significant agreement between mind and reality and that their potential discrepancies can be detected avoided and thus kept in check Of these two Hilbert clearly embraced the latter and proposed a program designed to vindicate the epistemological riches represented by our natural if non literal ways of thinking Brouwer on the other hand opted for a position closer in Hilbert's opinion to that of the skeptic Having decided that epistemological purity could come only through sacrifice he turned his back on his classical heritage to accept a higher calling

Gödel, Tarski and the Lure of Natural Language Juliette Kennedy, 2020-12-17 Is mathematics entangled with its various formalisations Or are the central concepts of mathematics largely insensitive to formalisation or formalism free What is the semantic point of view and how is it implemented in foundational practice Does a given semantic framework always have an implicit syntax Inspired by what she calls the natural language moves of Gödel and Tarski Juliette Kennedy considers what roles the concepts of entanglement and formalism freeness play in a range of logical settings from computability and set theory to model theory and second order logic to logicity developing an entirely original philosophy of mathematics along the way The treatment is historically logically and set theoretically rich and topics such as naturalism and foundations receive their due but now with a new twist

Assumptions of Grand Logics J.K. Feibleman, 2012-12-06 A system of philosophy of the sort presented in this and the following volumes begins with logic Philosophy properly speaking is characterized by the kind of logic it employs for what it employs it assumes however silently and what it assumes it presupposes The logic stands behind the ontology and is so to speak metaphysically prior One word of caution The philosophical aspects of logic have lagged behind the mathematical aspects in point of view of interest and development The work of N Rescher and others have gone a long way to correct this However their work on philosophical logic has been more concerned with the logical than with the philosophical aspects I have in mind another approach one that would call attention to the ontological systematic meta physics or metaphysical critical ontology aspects whichever term you prefer It is this approach which I have pursued in the following chapters Since together they stand at the head of a system of philosophy which has been developed in some seventeen books a system which ranges over all of the topics of philosophy the chosen approach can be seen as the necessary one But I have not written any logic I have merely indicated the sort of logic that has to be written

Beyond the Horizon of Computability Marcella Anselmo, Gianluca Della Vedova, Florin Manea, Arno Pauly, 2020-06-23 This book constitutes the proceedings of the 16th Conference on Computability in Europe CiE 2020 which was planned to be held in Fisciano Italy during June 29 until July 3 2020 The conference moved to a virtual format due to the coronavirus pandemic The 30 full and 5 short papers presented in this volume were carefully reviewed and selected from 72 submissions CiE promotes the development of computability related science ranging over mathematics computer science and

applications in various natural and engineering sciences such as physics and biology as well as related fields such as philosophy and history of computing CiE 2020 had as its motto Beyond the Horizon of Computability reflecting the interest of CiE in research transgressing the traditional boundaries of computability theory
