Animal Geographies Place Politics And Identity In The Nature Culture Borderlands:

Animal Geographies Jennifer Wolch, Jody Emel, 1998-09-17 Each year billions of animals are poisoned dissected displaced killed for consumption or held in captivity usually for the benefit of humans The animal world has never been under greater peril and this broad ranging collection contributes to a much needed fundamental rethinking about our relation with it *Animal Geographies* explores the diverse ways in which animals shape the formation of human identity Essays on zoos and wolves for example reveal how animals figure in social constructions of race gender and nationality From questions of identity and subjectivity it moves to a consideration of the places where people and animals confront the realities of coexistence on an everyday basis by way of case studies of species such as mountain lions and the golden eagle It then examines the ways in which animals figure in the ongoing globalization of production and mass consumption illustrated by essays on the US meatpacking industry and meat production in the Indian state of Rajasthan and finally takes up legal and ethical approaches to human animal relations *Animal Geographies* compels a profound rethinking of the nature of human animal relations and offers a series of proposals for reconstituting this relationship on a progressive basis Contributors Kay Anderson Glen Elder Andrea Gullo Unna Lassiter William S Lynn Suzanne M Michel Chris Philo James D Proctor Paul Robbins Frances M Ufkes James L Wescoat Jr *Critical Animal Geographies* Kathryn Gillespie, Rosemary-Claire Collard, 2015-01-30 *Critical Animal Geographies* provides new geographical perspectives on critical animal studies exploring the spatial political and ethical dimensions of animals lived experience and human animal encounter It works toward a more radical politics and theory directed at the shifting boundary between human and animal Chapters draw together feminist political economic post humanist anarchist post colonial and critical race literatures with original case studies in order to see how efforts by some humans to control and order life human and not violate constrain and impinge upon others Central to all chapters is a commitment to grappling with the stakes violence death life autonomy of human animal encounters Equally the work in the collection addresses head on the dominant forces shaping and dependent on these encounters capitalism racism colonialism and so on In doing so the book pushes readers to confront how human animal relations are mixed up with overlapping axes of power and exploitation including gender race class and species [A Research Agenda for Animal Geographies](#) Alice Hovorka, Sandra McCubbin, Lauren Van Patter, 2021-06-25 Exploring the innovative and thriving field of animal geographies this Research Agenda analyses how humans think about place and engage with animals Chapters explore how animals shape human identities and social dynamics as well as how broader processes influence the circumstances and experiences of animals **A Companion to Feminist Geography** Lise Nelson, Joni Seager, 2025-07-28 *A Companion to Feminist Geography* captures the breadth and diversity of this vibrant and substantive field Shows how feminist geography has changed the landscape of geographical inquiry and knowledge since the 1970s Explores the diverse literatures that comprise feminist geography today Showcases cutting edge research by feminist geographers Charts emerging areas of

scholarship such as the body and the nation Contributions from 50 leading international scholars in the field Each chapter can be read for its own distinctive contribution Historical Animal Geographies Sharon Wilcox, Stephanie Rutherford, 2018-05-11 Arguing that historical analysis is an important yet heretofore largely underexplored dimension of scholarship in animal geographies this book seeks to define historical animal geography as the exploration of how spatially situated human animal relations have changed through time This volume centers on the changing relationships among people animals and the landscapes they inhabit taking a spatio temporal approach to animal studies Foregrounding the assertion that geography matters as much as history in terms of how humans relate to animals this collection offers unique insight into the lives of animals past how interrelationships were co constructed amongst and between animals and humans and how nonhuman actors came to make their own worlds This collection of chapters explores the rich value of work at the contact points between three sub disciplines demonstrating how geographical analyses enrich work in historical animal studies that historical work is important to animal geography and that recognition of animals as actors can further enrich historical geographic research Handbook of Cultural Geography Kay Anderson, 2003 Presenting a state of the art assessment of the key questions informing cultural geography in the 21st century this handbook emphasises the intellectual diversity of the discipline and is cross referenced throughout **Facing the Wild** Chilla Bulbeck, 2012-06-25 What do wild animals mean to humans Will they survive both rampant habitat loss and extinction caused by human encroachment and as ecotourists our enthusiasm for them With ecotourism now the fastest growing segment of tourism and encounters with wild animals be it swimming with dolphins going on safari or bird watching ever more popular these are critical questions Yet until now little has been known about why people crave encounters with wild animals and the meaning for the ecotourism industry conservation efforts and society at large Facing the Wild is the first serious empirical examination of why people seek out animals in their natural environment what the desire for this experience tells us about the meanings of animals nature authenticity and wilderness in contemporary industrialized societies and whether visitors change their environmental perspectives and behaviour as the custodians of wildlife parks would like them to The book explores the contradictions and ambivalence that so many people experience in the presence of wild nature in loving it we may diminish it and in the act of wanting to see it we may destroy it Ultimately the book makes a case for respectful stewardship of a hybrid nature and provides insight for both practitioners and ecotourists alike *Animal Resistance in the Global Capitalist Era* Sarat Colling, 2020-12-01 The concept of animal resistance is now reaching a wide audience across the social media landscape Animal Resistance in the Global Capitalist Era offers an overview of how animals resist human orderings in the context of capitalism domestication and colonization Exploring this understudied phenomenon this book is attentive to both the standpoints of animal resisters and the ways they are represented in human society Together these lenses provide insight into how animals resistance disrupts the dominant paradigm of human exceptionalism and the distancing strategies of

enterprises that exploit animals for profit Animals have been relegated to the margins by human spatial and ideological orderings but they are also the subjects of their own struggle located at the center of their liberation movement Well researched and accessible with over fifty images that aid in understanding both the experiences of and responses to animals who resist Animal Resistance in the Global Capitalist Era is an important contribution to scholarship on animals and society The text will appeal to a broad audience interested in the relationships between humans and the other animals with whom we share this planet Places of Nature in Ecologies of Urbanism Anne Rademacher, K. Sivaramakrishnan, 2017-03-01 If twenty first century urbanization is understood as a problem its regional epicenter is the cities in Asia Facing unprecedented diversity in scale scope and environmental dynamics in the Asian urban experience scholars will need an approach that can truly capture the significance of place and context The challenge as this volume illustrates can be met by the analytic of ecologies of urbanism Eschewing a rigid single ecology the contributors identify multiple forms of nature in biophysical cultural and political terms that have discernable impact on power relations and human social action The case studies in this book including leopards in Mumbai a network of tubewells in northern India an island that grows through reclamation in Hong Kong and a railway continuum linking Khon Kaen and Bangkok all attest to the versatility of ecologies of urbanism Guided by urban processes rather than geopolitical boundaries Places of Nature in Ecologies of Urbanism offers a picture of urban Asia that is composed of varied ecologies of urbanism This intellectually adventurous work displays a deep cultural ethical sensibility in its close attention to geographically variegated forms of place making A first rate contribution to urban scholarship on Asia and beyond Vinay K Gidwani Department of Geography Environment and Society and Institute for Global Studies University of Minnesota This volume derives from a several year collaborative effort to bring scholars from different disciplines together to reflect on the constructed shifting and contested meanings of the forward slash separating Urban Natures The essays in this volume are bold rigorous original and sometimes even witty Without losing track of the intellectual genealogies that enable their collective effort the authors in Places of Nature in Ecologies of Urbanism give us new tools for imagining urban Asia s possible futures William Glover Department of History University of Michigan Mad about Wildlife Ann Herda-Rapp, Theresa Goedeke, 2005-05-01 This edited volume documents the presence and types of Nature discourse that emerge during conflicts between people over wildlife This collection of qualitative case studies demonstrates how social groups create opposing symbolic meanings of Nature and highlights the way in which the successful imposition of those meanings affects wildlife people generally and management professionals Together the chapters illustrate the significant untapped utility of constructionist approaches for understanding social conflict over wildlife issues and for managing natural resources in a way that acknowledges and incorporates different definitions of nature
