and successful programs don't require dedicating an entire area of the library to makerspace activities or sophisticated technologies such as 3D printers. **Make It Here: Inciting Creativity and Innovation in Your Library** provides a complete step by step guide for starting a makerspace program at your library and follows through with instructions for operation and building on your success. This book takes you step by step through starting your maker program from finding the right makerspace mix, making a plan and working with staff to establishing funding and support, launching your makerspace and evaluating and refining your programs. The authors provide guidance based on their personal experiences in creating and developing maker programs in their libraries as well as feedback and lessons learned from library makers across the country. You'll see how easy it can be to bring their ideas to life in ways that will empower your community and be encouraged to be bold and think outside of the box when imagining the possibilities.

The Maker's Guide to the Zombie Apocalypse Simon

Monk, 2015-10-01 Where will you be when the zombie apocalypse hits? Trapping yourself in the basement? Roasting the family pet? Beheading reanimated neighbors? No way! You'll be building fortresses, setting traps and hoarding supplies because you, savvy survivor, have snatched up your copy of *The Maker's Guide to the Zombie Apocalypse* before it's too late. This indispensable guide to survival after Z-day, written by hardware hacker and zombie anthropologist Simon Monk, will teach you how to generate your own electricity, salvage parts, craft essential electronics and out-survive the undead. Take charge of your environment: Monitor zombie movement with trip wires and motion sensors. Keep vigilant watch over your compound with Arduino and Raspberry Pi surveillance systems. Power zombie defense devices with car batteries, bicycle generators and solar power. Escape imminent danger: Repurpose old disposable cameras for zombie-distracting flashbangs. Open doors remotely for a successful sprint home. Forestall subplot disasters with fire and smoke detectors. Communicate with other survivors: Hail nearby humans using Morse code. Pass silent messages with two-way vibration walkie-talkies. Fervently scan the airwaves with a frequency hopper. For anyone from the budding maker to the keen hobbyist, *The Maker's Guide to the Zombie Apocalypse* is an essential survival tool. Uses the Arduino Uno board and Raspberry Pi Model B or Model 2.

The Art of Coding Mohammad Majid al-Rifaie, Anna Ursyn, Theodor Wyeld, 2020-02-14 As the title suggests, this book explores the concepts of drawing, graphics and animation in the context of coding. In this endeavour, in addition to initiating the process with some historical perspectives on programming languages, it prides itself by presenting complex concepts in an easy-to-understand fashion for students, artists, hobbyists as well as those interested in computer science, computer graphics, digital media or interdisciplinary studies. Being able to code requires abstract thinking, mathematics skills, spatial ability, logical thinking, imagination and creativity. All these abilities can be acquired with practice and can be mastered by practical exposure to art, music and literature. This book discusses art, poetry and other forms of writing while pondering difficult concepts in programming; it looks at how we use our senses in the process of learning computing and programming. Features: Introduces coding in a visual way. Explores the elegance behind coding and the outcome. Includes types of outcomes and

options for coding Covers the transition from front of classroom instruction to the use of online streamed video tutorials Encourages abstract and cognitive thinking as well as creativity The Art of Coding contains a collection of learning projects for students instructors and teachers to select specific themes from Problems and projects are aimed at making the learning process entertaining while also involving social exchange and sharing This process allows for programming to become interdisciplinary enabling projects to be co developed by specialists from different backgrounds enriching the value of coding and what it can achieve The authors of this book hail from three different continents and have several decades of combined experience in academia education science and visual arts Source Code The source code for the book can be accessed here
