A Metaphysics Of Psychopathology Philosophical Psychopathology:

A Metaphysics of Psychopathology Peter Zachar, 2014-03-28 An exploration of what it means to think about psychiatric disorders as real true and objective and the implications for classification and diagnosis In psychiatry few question the legitimacy of asking whether a given psychiatric disorder is real similarly in psychology scholars debate the reality of such theoretical entities as general intelligence superegos and personality traits And yet in both disciplines little thought is given to what is meant by the rather abstract philosophical concept of real Indeed certain psychiatric disorders have passed from real to imaginary as in the case of multiple personality disorder and from imaginary to real as in the case of post traumatic stress disorder In this book Peter Zachar considers such terms as real and reality invoked in psychiatry but often obscure and remote from their instances as abstract philosophical concepts He then examines the implications of his approach for psychiatric classification and psychopathology Proposing what he calls a scientifically inspired pragmatism Zachar considers such topics as the essentialist bias diagnostic literalism and the concepts of natural kind and social construct Turning explicitly to psychiatric topics he proposes a new model for the domain of psychiatric disorders the imperfect community model which avoids both relativism and essentialism He uses this model to understand such recent controversies as the attempt to eliminate narcissistic personality disorder from the DSM 5 Returning to such concepts as real true and objective Zachar argues that not only should we use these metaphysical concepts to think philosophically about other concepts we should think philosophically about them

Philosophical Psychopathology George Graham, G. Lynn Stephens, 1994 A benchmark volume for an emerging field where mental disorders serve as the springboard for philosophical insights

Extraordinary Science and Psychiatry Jeffrey Poland, Serife Tekin, 2024-04-30 Leading scholars offer perspectives from the philosophy of science on the crisis in psychiatric research that exploded after the publication of DSM 5 Psychiatry and mental health research is in crisis with tensions between psychiatry's clinical and research aims and controversies over diagnosis treatment and scientific constructs for studying mental disorders At the center of these controversies is the Diagnostic and Statistical Manual of Mental Disorders DSM which especially after the publication of DSM 5 many have found seriously flawed as a guide for research This book addresses the crisis and the associated extraordinary science Thomas Kuhn's term for scientific research during a state of crisis from the perspective of philosophy of science The goal is to help reconcile the competing claims of science and phenomenology within psychiatry and to offer new insights for the philosophy of science The contributors discuss the epistemological origins of the current crisis the nature of evidence in psychiatric research and the National Institute for Mental Health's Research Domain Criteria project They consider particular research practices in psychiatry computational personalized mechanistic and user led and the specific categories of schizophrenia depressive disorder and bipolar disorder Finally they examine the DSM's dubious practice of pathologizing normality Contributors Richard P Bentall John Bickle Robyn Bluhm Rachel Cooper Kelso Cratsley Owen Flanagan Michael Frank

George Graham Giger A Hoffman Harold Kincaid Aaron Kostko Edouard Machery Jeffrey Poland Claire Pouncey erife Tekin Peter Zachar Real Hallucinations Matthew Ratcliffe, 2017-09-22 A philosophical account of the structure of experience and how it depends on interpersonal relations developed through a study of auditory verbal hallucinations and thought insertion In *Real Hallucinations* Matthew Ratcliffe offers a philosophical examination of the structure of human experience its vulnerability to disruption and how it is shaped by relations with other people He focuses on the seemingly simple question of how we manage to distinguish among our experiences of perceiving remembering imagining and thinking To answer this question he first develops a detailed analysis of auditory verbal hallucinations usually defined as hearing a voice in the absence of a speaker and thought insertion somehow experiencing one's own thoughts as someone else's He shows how thought insertion and many of those experiences labeled as hallucinations consist of disturbances in a person's sense of being in one type of intentional state rather than another Ratcliffe goes on to argue that such experiences occur against a backdrop of less pronounced but wider ranging alterations in the structure of intentionality In so doing he considers forms of experience associated with trauma schizophrenia and profound grief The overall position arrived at is that experience has an essentially temporal structure involving patterns of anticipation and fulfillment that are specific to types of intentional states and serve to distinguish them phenomenologically Disturbances of this structure can lead to various kinds of anomalous experience Importantly anticipation fulfillment patterns are sustained regulated and disrupted by interpersonal experience and interaction It follows that the integrity of human experience including the most basic sense of self is inseparable from how we relate to other people and to the social world as a whole Scaffolded Minds Somogy Varga, 2025-02-04 A comprehensive account of cognitive scaffolding and its significance for understanding mental disorders In *Scaffolded Minds* Somogy Varga offers a novel account of cognitive scaffolding and its significance for understanding mental disorders The book is part of the growing philosophical engagement with empirically informed philosophy of mind which studies the interfaces between philosophy and cognitive science Varga draws on two recent shifts within empirically informed philosophy of mind the first toward an intensified study of the embodied mind and the second toward a study of the disordered mind that acknowledges the convergence of the explanatory concerns of psychiatry and interdisciplinary inquiries into the mind Varga sets out to accomplish a dual task theoretical mapping of cognitive scaffolding and the application calibration of fine grained philosophical distinctions to empirical research He introduces the notion of actively scaffolded cognition ASC and offers a taxonomy that distinguishes between intrasomatic and extrasomatic scaffolding He then shows that ASC offers a productive framework for considering certain characteristic features of mental disorders focusing on altered bodily experience and social cognition deficits With *Cognitive Scaffolding* Varga aims to establish that shifting attention from mental symptoms to fine grained sensorimotor aspects can lead to identifying diagnostic subtypes or even specific sensorimotor markers for early diagnosis *Being Amoral* Thomas Schramme, 2014-08-22 Investigations of specific moral dysfunctions or deficits that shed

light on the capacities required for moral agency Psychopathy has been the subject of investigations in both philosophy and psychiatry and yet the conceptual issues remain largely unresolved This volume approaches psychopathy by considering the question of what psychopaths lack The contributors investigate specific moral dysfunctions or deficits shedding light on the capacities people need to be moral by examining cases of real people who seem to lack those capacities The volume proceeds from the basic assumption that psychopathy is not characterized by a single deficit for example the lack of empathy as some philosophers have proposed but by a range of them Thus contributors address specific deficits that include impairments in rationality language fellow feeling volition evaluation and sympathy They also consider such issues in moral psychology as moral motivation moral emotions and moral character and they examine social aspects of psychopathic behavior including ascriptions of moral responsibility justification of moral blame and social and legal responses to people perceived to be dangerous As this volume demonstrates philosophers will be better equipped to determine what they mean by the moral point of view when they connect debates in moral philosophy to the psychiatric notion of psychopathy which provides some guidance on what humans need in order be able to feel the normative pull of morality And the empirical work done by psychiatrists and researchers in psychopathy can benefit from the conceptual clarifications offered by philosophy Contributors Gwen Adshead Piers Benn John Deigh Alan Felthous Kerrin Jacobs Heidi Maibom Eric Matthews Henning Sass Thomas Schramme Susie Scott David Shoemaker Walter Sinnott Armstrong Matthew Talbert
