Addition Using Numicon:

Mastery Mathematics for Primary Teachers Robert Newell, 2019-05-14 This book explores how mathematical mastery influenced by East Asian teaching approaches can be developed in a UK context to enhance teaching and to deepen children's mathematical knowledge. It gives guidance on using physical resources to demonstrate key concepts, extended examples on how to teach different curriculum topics and how to plan for small step progression. Key coverage includes Key terminology in mastery style teaching, The challenges in implementing a mastery approach, The use of manipulative resources for deeper understanding, An analysis of mastery and related schemes of work currently available, Assessing mastery, How to apply mastery concepts in the early years. *Maths 5-11* Caroline Clissold, 2019-10-23 Focusing on good progression from Reception to Year 6, *Maths 5-11* provides a clear and concise presentation of the fundamental knowledge that all primary mathematics teachers need. It provides readers with practical knowledge for the planning and assessment necessary to employ the theories expressed in the book. Ranging from number sense and place value to looking in depth at the various aspects of fractions and mathematical reasoning, this book explores mathematical connections inside and outside of the curriculum, the relation of mathematics to other primary subjects such as science, geography and art, mathematics teaching practices from high performing jurisdictions across the world, the progression of learning from primary school to secondary school, the big ideas in mathematics and activities that provide strategies for children to use responsively and creatively. Helping primary teachers and mathematics coordinators improve and enhance their mathematical subject knowledge and pedagogy, *Maths 5-11* will re-instil an excitement about teaching mathematics among its readers. *Identifying, Assessing and Supporting Learners with Dyscalculia* Kathleen Kelly, 2020-07-13 Online Resources are open access. No code is required. It is vital to understand the challenges and provide the right support for learners with dyscalculia and specific learning difficulties in mathematics. The book provides an overview of current research explaining the nature and causation of dyscalculia, guidance on the identification of dyscalculia, examples of how to carry out informal and formal assessments, an explanation of the principles of multisensory mathematics teaching, an outline of a structured programme for learners aged 5-14 together with examples of lesson planning and activities. Designed for teachers specialising in the assessment and teaching of learners with dyscalculia and those undertaking courses leading to Approved Teacher Dyscalculia ATD and Associate Membership of the British Dyslexia Association (AMBDA), the book is useful to any professional looking for an understanding of this area of specific difficulty. *Mathematics Through Play in the Early Years* Kate Tucker, 2014-01-14 The book is grounded in the latest research about how children become effective learners, particularly in relation to mathematics. Bringing together research and practice in an accessible way, Kate Tucker provides an essential resource for all those who work with young children. I strongly recommend it. Dr Sue Rogers, Head of Department of Early Years and Primary Education, Institute of Education. Offering practical examples of focused playful teaching, this popular book is back for a third edition.
