Adipose Tissue And Cancer Adipose Tissue And Cancer:

Adipose Tissue and Cancer Mikhail G. Kolonin, 2013-07-17 Recent studies have shown that cells from adipose tissue are capable of trafficking to tumors thus enabling paracrine action of adipokines from within the tumor microenvironment Increased tumor vascularization immune system suppression and direct effects on malignant cell survival and proliferation have been investigated as mechanisms regulated by adipokines The goal of this book is to discuss data pointing to the role of adipose tissue in cancer and to dissect individual mechanisms through which adipose tissue excess or restriction could influence cancer progression *Obesity, Inflammation and Cancer* Andrew J. Dannenberg, Nathan A. Berger, 2013-05-21 In addition to its metabolic and endocrinologic effects obesity and adipose tissue have now been shown to be associated with low grade inflammation resulting in cellular and humoral inflammatory factors of which the latter may act by endocrine paracrine and autocrine mechanisms These inflammatory mediators have increasingly been suggested as contributing to the obesity link to carcinogenesis and cancer promotion This volume of Energy Balance and Cancer will focus on recent developments and cutting edge research pointing to inflammation and inflammatory factors as key mediators of this linkage The volume first provides information on inflammation as an important link between obesity and insulin resistance which is in itself linked to promotion of cancer through hyperinsulinemia The volume then covers some of the most important mechanisms by which obesity leads to inflammation including the novel inflammasome concept alterations in chromatin structure circulating inflammatory factors unique cellular interactions between adipocytes and macrophages and the direct link of dietary fat to inflammation and cancer Overall this volume will provide important insight to help understand how inflammation may help modulate the linkage between obesity and cancer and serve as a platform for developing future research in this area *Adipocytokines, Energy Balance, and Cancer* Ofer Reizes, Nathan A. Berger, 2016-10-31 Adipocytokines provide the circuitry by which adipose tissue communicates among its component cells which include adipocytes stromal cells immune cells and vascular elements with adipose tissue depots in other locations throughout the body and with other tissues in order to regulate physiologic processes of energy intake utilization and distribution Since disturbances both qualitative and quantitative in adipocytokine function contribute significantly to many of the comorbidities associated with obesity including diabetes cardiovascular disease and cancer this volume which discusses most of the major adipocytokines independently and collectively and their roles in normal and pathologic processes should be useful to all individuals seeking a deeper understanding of these processes Moreover it provides a valuable complement to the series on Energy Balance and Cancer in which each volume is focused on a specific aspect of this process which now constitutes an expanding problem as the obesity pandemic continues and more of the population reaches the age where cancer is most prevalent This volume should provide a valuable resource to all clinicians and scientists engaged in caring for susceptible patients and in exploring the relation between energy balance and cancer as well as an important platform to providing the

background for research development

Adipose Tissue in Health and Disease Todd Leff, James G.

Granneman, 2010-03-19 This timely and most comprehensive reference available on the topic covers all the different aspects vital in the fight against the global obesity epidemic Following a look at adipose tissue development and morphology the authors go on to examine its metabolic and endocrine functions and its role in disease The final section deals with comparative and evolutionary aspects of the tissue The result is an essential resource for cell and molecular biologists physiologists biochemists pharmacologists and those working in the pharmaceutical industry Adipose Tissue and Adipokines in Health and Disease Giamila Fantuzzi, Carol Braunschweig, 2014-04-25

The field of adipose tissue biology has been expanding at a very rapid pace in the last few years Numerous advances have been made since publication of the first edition of this book in terms of basic adipocyte biology understanding of the determinants of obesity distribution of body fat and weight loss as well as the mechanisms linking excess adiposity to various co morbidities Adipose Tissue and Adipokines in Health and Disease Second Edition contains updated chapters from the previous volume but as the field has evolved some areas covered in the first edition have been refocused to address the new knowledge The volume is divided in four sections the first two deal with basic adipose tissue and adipokine biology while the last two address the problem of obesity and alterations in adipose tissue function from an epidemiological and clinical standpoint The chapters are written by experts in their fields and include the most up to date scientific information Adipose Tissue and Adipokines in Health and Disease Second Edition is a useful resource for physicians interested in adipose tissue biology and basic scientists who want to know more about applied aspects of the field The book targets endocrinologists residents and fellows internists nutritionists and general practitioners who are exposed to an ever expanding obese population Adipose Tissue in the Cardiovascular Homeostasis and Disease Thiago Bruder, Ana Paula Davel, Joshua Thomas Butcher, 2022-01-13

Estrogens, Estrogen Receptor and Breast Cancer Fritz F. Parl, 2000 Estrogens have been implicated to play a role in the development of breast cancer The purpose of this book is to provide a comprehensive analysis of experimental clinical and epidemiological evidence in support of the carcinogenicity of estrogens T Cell Alterations in Adipose Tissue During Obesity, HIV and Cancer Dorothy Ellen Lewis, Joanne Lysaght, Huaizhu Wu, 2019-09-25

Nutrition and Cancer Vera C. Mazurak, 2018-06-22 This book is a printed edition of the Special Issue Nutrition and Cancer that was published in Nutrients **Obesity and Cancer** Shashank Kumar, Sanjay Gupta, 2021-07-18

This book highlights the concordance between signaling pathways that are involved in obesity and cancer cross talks It describes the role of cytokines chemokines growth factors insulin and adipokines in the development of obesity associated cancers The book reviews the role of inflammatory signaling pathways such as estrogen mediated signaling mTOR and AMP activated protein kinase pathway and the involvement of adaptive and innate immunity oxidative stress gene polymorphism dietary phytochemicals and miRNAs in obesity and cancer In addition it covers the latest research on the drugs and natural therapeutic agents that target obesity induced cancers and discusses various in
