The Club-book Andrew Picken, 1831 **Novel Ecologies** Allison Carruth, 2025-03-04 Tracing the convergence of ecology and engineering over the last three decades this book pinpoints a new environmental paradigm that the author calls Nature Remade Allison Carruth s *Novel Ecologies* shows how the tech industry has taken up the wilderness mythologies that shaped one strain of American environmentalism over the last century Calling this twenty first century environmental imagination Nature Remade Carruth describes a distinctly West Coast framework that is at once nostalgic and futuristic Through three case studies synthetic wildlife the digital cloud and space colonization the book shows Nature Remade to be a quasi religious belief in venture capitalism and big tech This paradigm thus imagines a future in which species ecosystems and entire planets are re generated and re created through engineering *Novel Ecologies* challenges the conviction that climate change and other environmental crises must be met with ever larger scale forms of technological intervention

Against the new worlds conjured by Google Meta Open AI Amazon SpaceX and a host of lesser known start ups Carruth marshals writers and artists who imagine provisionally hopeful environmental futures while refusing to forget the histories that have made the world what it is On this track of the book Carruth discusses the works of Octavia Butler Becky Chambers Jennifer Egan Ruth Ozeki Craig Santos Perez Tracy K Smith Jeff VanderMeer Saya Woolfalk and many more Their novels poems installation artworks and expressive media offer a speculative world built on livable communities rather than engineered lifeforms **The Club-book; being original tales** Andrew Picken,1856 Novel Style Ben
