Breinbevingen Snelle Omslagen In Opinie En Communicatie:

Collective Behavior and Public Opinion Jaap van Ginneken, 2003-04-02 This is a highly innovative and stimulating work with the outline of an entirely new approach to massive and rapid shifts in opinion and communication. It discusses and explains such mysterious phenomena as sudden crazes and crashes, fads and fashion hypes and manias, moral outrage and protests, gossip and rumors and scares and panics. Rich in alternative insights, the book is divided into four parts. Part I discusses the points of departure, the most relevant processes of opinion formation and communication. Part II is about phenomena on three different levels that have traditionally been studied within the twin fields of mass psychology and collective behavior sociology. Part III focuses on the three prime forms of emotional coloring of opinion currents and public moods. Part IV discusses a combination of some of the aforementioned phenomena: successive crazes and crashes in financial markets and looks at why technological and economic and social and opinion forecasts often fail so miserably. The audience for this book includes students of social and mass psychology, social movements and collective behavior sociology and opinion and communication in general. Professionals in public relations, marketing, health, finance and politics, as well as the educated lay audience, will also find this book of interest.

Communication for Rural Innovation Cees Leeuwis, 2013-04-30 This important book is the re-titled third edition of the extremely well received and widely used *Agricultural Extension* van den Ban Hawkins 1988. Building on the previous editions, *Communication for Rural Innovation* maintains and adapts the insights and conceptual models of value today while reflecting many new ideas, angles and modes of thinking concerning how agricultural extension is taught and carried through today. Since the previous edition of the book, the number and type of organisations that apply communicative strategies to foster change and development in agriculture and resource management has become much more varied, and this book is aimed at those who use communication to facilitate change in agriculture and resource management. *Communication for Rural Innovation* is essential reading for process facilitators, communication division personnel, knowledge managers, training officers, consultants, policy makers, extension specialists and managers of agricultural extension or research organisations. The book can also be used as an advanced introduction into issues of communicative intervention at BSc or MSc level.

Monitoring Public Perception of Organisations Marita Vos, H. Schoemaker, 2006 This book enhances understanding of organizational reputation and image. It provides a measurement method and explains the scientific background.

The Science and Art of Branding Giep Franzen, Sandra E. Moriarty, 2015-02-12 This innovative work provides a state of the art overview of current thinking about the development of brand strategy. Unlike other books on branding, it approaches successful brand strategy from both the producer and consumer perspectives. *The Science and Art of Branding* makes clear distinctions among the producer's intentions, external brand realities and consumer's brand perceptions, and explains how to fit them all together to build successful brands. Co-author Sandra Moriarty is also the author of the leading *Principles of Advertising* textbook, and she and Giep Franzen have

filled this volume with practical learning tools for scholars and students of marketing and marketing communications as well as actual brand managers The book explains theoretical concepts and illustrates them with real life examples that include case studies and findings from large scale market research Every chapter opens with a mini case history and boxed inserts featuring quotes from experts appear throughout the book The Science and Art of Branding also goes much more deeply than other works into the core concept of brand equity employing new measurement systems only developed over the last few years *Crossroads* Robert J.
