The Problem with Survey Research George Beam, 2017-09-08 The Problem with Survey Research makes a case against survey research as a primary source of reliable information George Beam argues that all survey research instruments all types of asking including polls face to face interviews and focus groups produce unreliable and potentially inaccurate results Because those who rely on survey research only see answers to questions it is impossible for them or anyone else to evaluate the results They cannot know if the answers correspond to respondents actual behaviors objective phenomena or to their true beliefs and opinions subjective phenomena Reliable information can only be acquired by observation experimentation multiple sources of data formal model building and testing document analysis and comparison In fifteen chapters divided into six parts Ubiquity of Survey Research The Problem Asking Instruments Asking Settings Askers and Proper Methods and Research Designs The Problem with Survey Research demonstrates how asking instruments settings in which asking and answering take place and survey researchers themselves skew results and thereby make answers unreliable The last two chapters and appendices examine observation other methods of data collection and research designs that may produce accurate or correct information and shows how reliance on survey research can be overcome and must be

Pseudoscience Allison B. Kaufman, James C. Kaufman, 2019-03-12 Case studies personal accounts and analysis show how to recognize and combat pseudoscience in a post truth world In a post truth fake news world we are particularly susceptible to the claims of pseudoscience When emotions and opinions are more widely disseminated than scientific findings and self proclaimed experts get their expertise from Google how can the average person distinguish real science from fake This book examines pseudoscience from a variety of perspectives through case studies analysis and personal accounts that show how to recognize pseudoscience why it is so widely accepted and how to advocate for real science Contributors examine the basics of pseudoscience including issues of cognitive bias the costs of pseudoscience with accounts of naturopathy and logical fallacies in the anti vaccination movement perceptions of scientific
