And Module 10 Principles Govern Foundational:

An Analysis of Alexander Hamilton, James Madison, and John Jay's The Federalist Papers Jeremy Kleidosty, Jason Xidias, 2017-07-05 The 85 essays that make up The Federalist Papers clearly demonstrate the vital importance of the art of persuasion. Written between 1787 and 1788 by three of the Founding Fathers of the United States, the Papers were written with the specific intention of convincing Americans that it was in their interest to back the creation of a strong national government enshrined in a constitution and they played a major role in deciding the debate between proponents of a federal state with its government based on central institutions housed in a single capital and the supporters of states rights. The papers authors Alexander Hamilton, James Madison and John Jay believed that centralised government was the only way to knit their newborn country together while still preserving individual liberties. Closely involved with the politics of the time, they saw a real danger of America splintering to the detriment of all its citizens. Given the fierce debates of the time, however, Hamilton, Jay and Madison knew they had to persuade the general public by advancing clear, well-structured arguments and by systematically engaging with opposing points of view. By enshrining checks and balances in a constitution designed to protect individual liberties, they argued, fears that central government would oppress the newly free people of America would be allayed. The constitution that the three men helped forge governs the US to this day and it remains the oldest written constitution still in force anywhere in the world.

Sustainable Rail Transport Anna Fraszczyk, Marin Marinov, 2018-06-19 These conference proceedings include a collection of articles presented at the RailExchange conference in October 2017 at Newcastle University, UK. They will be useful for researchers in developing countries looking for opportunities of knowledge exchange. The RailExchange project aimed to develop sustainable railway education in Thailand via international partnerships and industry collaborations based around stakeholders' expertise and experiences. It involved staff exchange, academics and researchers between Mahidol and Newcastle University for joint research and curriculum development and also organizing railway conferences and workshops in both Thailand and the UK. The papers published here focus on rail-related issues and present a perspective of a widely understood exchange in academia and industry environments. Exchange is perceived as rail knowledge exchange between partners, rail staff exchange between academia and/or industry, research exchange between teams, student/lecturer knowledge exchange, academia/industry collaboration, etc. In addition, more general rail-related papers are also included.
