Safety

Seat belts must be worn on every journey, even on short trips in town. To ensure that the seat belts, belt tensioners and airbags are fully effective, note the following points:

Adjust seat and sit in correct position

The front seats should not be positioned too close to the steering wheel or dashboard. Maintain a distance of at least 25 cm from the steering wheel. It is important to sit in a normal, upright position and let the backrest sit fully against your back. The top of the head restraint should be at eye level (or higher). Put your feet in a comfortable position in the footrest.

Wear the seat belt correctly

Make sure that the shoulder section of the belt is positioned over the centre of the shoulder, and move the lap section as far down over the hips as possible. The belts should always be worn so that they fit tightly (see illustration).

Filling the tank

Releasing the tank flap

Press the switch with the filler pump symbol in the centre console to open the tank flap. Then unscrew the tank cap and lock it onto the flap (see illustration).
