Antitrust and Upstream Platform Power Plays A. K. von Moltke, 2023-12-20 In recent years large digital platforms have been in the doghouse of antitrust decision makers worldwide Antitrust regulators agree urgent intervention is needed Interestingly it is the plight of victimized suppliers of merchants app developers publishers platform labourers and the like who are upstream in the value chain that has topped the policy agenda prompting scrutiny of an almost unprecedented intensity Amid such anxieties Antitrust and Upstream Platform Power Plays asks a somewhat provocative question are upstream platform power plays really competition problems and ones for antitrust at that The obvious answer yes is deceptively simple for a number of reasons First it contradicts contemporary antitrust's single minded focus on consumers which has all but erased supplier exploitation in the brick and mortar economy from the policy's radar Second the wider antitrust community remains bitterly divided when it comes to judging platform practices In addition if any consensus could be had it would almost certainly confirm the long standing tenet that antitrust cannot be about supplier welfare as such These paradoxes call for a policy introspection precisely what this book provides The analysis offered in Antitrust and Upstream Platform Power Plays is altogether normative theoretical and practical Normative because it engages in a supplier mindful soul searching exercise which advances our understanding of antitrust's foundations theoretical as it sheds multidisciplinary insights on upstream effects in the platform economy and develops new frameworks for rationalizing them and practical since it takes a deep dive into the complex antitrust machinery while staying attuned to other available levers of
