The Rating Agencies and Their Credit Ratings Herwig Langohr,Patricia Langohr,2010-04-01 Credit rating agencies play a critical role in capital markets guiding the asset allocation of institutional investors as private capital moves freely around the world in search of the best trade off between risk and return However they have also been strongly criticised for failing to spot the Asian crisis in the early 1990s the Enron WorldCom and Parmalat collapses in the early 2000s and finally for their ratings of subprime related structured finance instruments and their role in the current financial crisis This book is a guide to ratings the ratings industry and the mechanics and economics of obtaining a rating It sheds light on the role that the agencies play in the international financial markets It avoids the sensationalist approach often associated with studies of rating scandals and the financial crisis and instead provides an objective and critical analysis of the business of ratings The book will be of practical use to any individual who has to deal with ratings and the ratings industry in their day to day job Reviews Rating agencies fulfil an important role in the capital markets but given their power they are frequently the object of criticism Some of it is justified but most of it portrays a lack of understanding of their business In their book The Rating Agencies and their Credit Ratings Herwig and Patricia Langohr provide an excellent economic background to the role of rating agencies and also a thorough understanding of their business and the problems they face I recommend this book to all those who have an interest in this somewhat arcane but extremely important area Robin Monro Davies Former CEO Fitch Ratings At a time of unprecedented public and political scrutiny of the effectiveness and indeed the basic business model of the Credit Rating industry and heightened concerns regarding the transparency and accountability of the leading agencies this book provides a commendably comprehensive overview and should provide invaluable assistance in the ongoing debate Rupert Atkinson Managing Director Head of Credit Advisory Group Morgan Stanley and member of the SIFMA Rating Agency Task Force The Langohrs have provided useful information in a field where one frequently finds only opinions or misconceptions They supply a firm base from which to understand changes now underway A well read copy of this monograph should be close to the desk of every investor issuer and financial regulator legislator or commentator John Grout Policy and Technical Director The Association of

Corporate Treasurers The Economist ,1946 The New Capital Markets in Central and Eastern Europe Michael Schröder,2012-12-06 It is the aim of this study to assess the effects of the EU enlargement on the capital markets in the most advanced countries of Central and Eastern Europe CEE and Russia and to analyse the impacts on the interactions between Eastern and Western capital markets due to the integration process Therefore this study should be particularly useful for financial analysts institutional investors and academic researchers who are interested in the economic and institutional developments of capital markets in CEE countries and are looking for a thorough and comprehensive analysis of the future perspectives of these capital markets The European Union has opened negotiations for EU membership in early 1998 with five CEE countries the Czech Republic Estonia Hungary Poland and Slovenia In autumn 1999 the group of CEE countries involved in the negotiations for EU membership has been enlarged by Bulgaria Latvia Lithuania Romania and Slovakia The negotiations with some of the CEE countries have already reached a stage that makes entry into the EU in the next few years very likely The joining countries have to adopt the whole *acquis communautaire* which represents the legislative framework common to all EU members Important parts of the *acquis communautaire* e g the liberalisation of capital movements European Monetary Union the free provision of bank and non bank financial services and new rules for prudential supervision directly and indirectly affect the behaviour of the financial sector and the functioning of capital markets

Contemporary Financial Intermediation Stuart I. Greenbaum,Anjan V. Thakor,Arnoud W. A. Boot,2019-05-14 Contemporary Financial Intermediation 4th Edition by Greenbaum Thakor and Boot continues to offer a distinctive approach to the study of financial markets and institutions by presenting an integrated portrait that puts information and economic reasoning at the core Instead of primarily naming and describing markets regulations and institutions as is common Contemporary Financial Intermediation explores the subtlety plasticity and fragility of financial institutions and credit markets In this new edition every chapter has been updated and pedagogical supplements have been enhanced For the financial sector the best preprofessional training explains the reasons why markets institutions and regulators evolve they do why we suffer recurring financial crises occur and how we typically react to them Our textbook demands more in terms of quantitative skills and analysis but its ability to teach about the forces shaping the financial world is unmatched Updates and expands a legacy title in a valuable field Holds a prominent position in a growing portfolio of finance textbooks Teaches tactics on how to recognize and forecast fluctuations in financial markets **Asset Pricing** T. Kariya,Regina Liu,2011-06-27 1 Main Goals The theory of asset pricing has grown markedly more sophisticated in the last two decades with the application of powerful mathematical tools such as probability theory stochastic processes and numerical analysis The main goal of this book is to provide a systematic exposition with practical applications of the no arbitrage theory for asset pricing in financial engineering in the framework of a discrete time approach The book should also serve well as a textbook on financial asset pricing It should be accessible to a broad audience in particular to practitioners in financial and related industries as well as

to students in MBA or graduate advanced undergraduate programs in finance financial engineering financial econometrics or financial information science The no arbitrage asset pricing theory is based on the simple and well accepted principle that financial asset prices are instantly adjusted at each moment in time in order not to allow an arbitrage opportunity Here an arbitrage opportunity is an opportunity to have a portfolio of value at an initial time lead to a positive terminal value with probability 1 equivalently at no risk with money neither added nor subtracted from the portfolio in rebalancing during the investment period It is necessary for a portfolio of value to include a short sell position as well as a long buy position of some assets

Derivatives and Internal Models H. Deutsch, 2003-12-17 The successful first edition provided an introduction to the valuation and risk management of modern financial instruments formulated in a precise mathematical expression and comprehensively covering all relevant topics using consistent and exact notation In this edition Deutsch continues with this philosophy covering new and more advanced topics including risk adjusted performance and portfolio optimization This edition also includes a CD ROM in the form of Excel workbooks giving detailed models of the concepts discussed in the book

Green Finance and Investment Mechanisms to Prevent Carbon Lock-in in Transition Finance OECD, 2023-09-26 Carbon lock in occurs when high emission infrastructure or assets continue to be used despite the possibility of substituting them with low emission alternatives thereby delaying or preventing the transition to near zero or zero emission alternatives Transition finance which focuses on the dynamic transformation and decarbonisation of hard to abate sectors frequently faces the issue of carbon lock in particularly in considerations of investment feasibility and eligibility
