Basic Biotechnology Colin Ratledge, Bjorn Kristiansen, 2006-05-25 Biotechnology is one of the major technologies of the twenty first century Its wide ranging multi disciplinary activities include recombinant DNA techniques cloning and the application of microbiology to the production of goods from bread to antibiotics In this new edition of the textbook Basic Biotechnology biology and bioprocessing topics are uniquely combined to provide a complete overview of biotechnology The fundamental principles that underpin all biotechnology are explained and a full range of examples are discussed to show how these principles are applied from starting substrate to final product A distinctive feature of this text are the discussions of the public perception of biotechnology and the business of biotechnology which set the science in a broader context This comprehensive textbook is essential reading for all students of biotechnology and applied microbiology and for researchers in biotechnology industries

Bioreactor Design Fundamentals Norton G. McDuffie, 2013-10-22 Bioreactor Design Fundamentals presents the development in the bioreactor field This book discusses the applications of biological kinetics and thermodynamics Organized into seven chapters this book begins with an overview of the design of biological reactors that involves determining operating conditions sizing the reactor controlling temperature and sterility and controlling operating variables This text then examines the significance of pH considerations in biological reactor and process design Other chapters consider enzyme kinetics and the equations most commonly used as models for overall enzyme kinetics This book discusses as well the mass transfer rates in bioreactors which are significant because of their effects on some chemical reaction rates in transformations by enzymes or by living cells The final chapter deals with the ideal state of the continuous stirred tank reactors CSTRs This book is a valuable resource for biochemical engineers and industrial microbiologists
