Reinus,Jasvir S. Khurana,2010-06-09 We dedicate this text to Drs Ernest E Aegerter a pathologist and John A Kirkpatrick Jr a radiologist They were among the principal founders of the field of skeletal pathology and radiology During their time their residents and colleagues knew them as great educators with a dedication and a passion for their work Their textbook Orthopedic Diseases published initially in 1958 was among the first interdisciplinary works devoted to this field Dr Aegerter and Dr Kirkpatrick illuminated many aspects of the field of radiology Today with the advent of new technologies this field has grown to include not only diseases that affect the skeleton but also those that affect muscles ligaments tendons and also the cartilaginous structures within joints With this text we intend to carry on Dr Aegerter and Dr Kirkpatrick's tradition We have recruited only well known musculoskeletal radiologists and pathologists to participate in the writing of this book Each author has been carefully selected for his expertise on the topic about which he has been asked to contribute Each author is known as an experienced and seasoned teacher Each author has made a mark on the field Special Techniques in Internal Fixation C. Sequin,R. Texhammar,2012-12-06 During their 20 years of activity members of the Association for the Study of Internal Fixation AO

ASIF have made authoritative contributions to the development of internal and external fixation. The close collaboration of surgeons, basic researchers, metallurgists, engineers, and the establishment of clinical documentation has made it possible to achieve a solid scientific basis for internal fixation. Clear definitions for the standardization of different types of osteosynthesis were possible: interfragmentary compression, splintage, and buttressing, as well as combinations of these three techniques. At the same time, a scientific and workmanlike instrumentation was developed. The idea was to keep diversification within limits but, however, to assemble a comprehensive collection of implants and instruments to answer all the problems presented by the complexity of bone operations. Osteosynthesis is a difficult and demanding operative method. Its claims on the surgeon and the theatre staff are high. Therefore, plans have existed for a long time to supplement the Manual of Internal Fixation with a detailed description of the AO Instrumentation, its use, and maintenance. Our collaborator, FRIDOLIN SEQUIN, graduate engineer, has accomplished this task with expert knowledge. He has organized over many years courses for theatre nurses and has been able from the resulting experience to provide helpful suggestions. When RIGMOR TEXHAMMAR, RN, joined AO International four years ago, it was natural to include her as a co-author.
