DISCUSSION The present study highlights the need for a more comprehensive approach to the management of the elderly. The study also highlights the need for a more comprehensive approach to the management of the elderly. The study also highlights the need for a more comprehensive approach to the management of the elderly.

RE: In the context of future work, we would like to see the authors extend their model to include the effects of the environment on the system, as well as the effects of the system on the environment. This is a very important issue, and the authors should consider it in their future work.

Abstract—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and blood pressure (BP) of sedentary, middle-aged men. The subjects were divided into two groups: a control group and a training group. The training group performed a 10-week program of aerobic exercise, while the control group remained sedentary. HR and BP were measured at baseline and at the end of the 10-week period. The results showed that the training group had a significant decrease in both HR and BP compared to the control group. The decrease in HR was approximately 10 beats per minute, and the decrease in BP was approximately 10 mmHg. These findings suggest that a 10-week training program can effectively reduce HR and BP in sedentary, middle-aged men.

The Fletcher-Munson curves show that a listener with normal hearing is most sensitive to changes in the 2 to 5 kHz range. This range is critical for direction perception and intelligibility. Since the Auratone is especially effective in that frequency range, the increase in sound area presented, due to the Auratone, is most desirable.

An amplifier's capability and its function is just another question of the Fourier spectrum. Therefore, if an amplifier is used to improve the high end, all the noise and distortion will increase also. The high end of the input to the Aural Exciter can be rolled off and the Aural Exciter will

Another important difference between the Aural Decoder and other processing equipment is, the Aural Decoder will not only store incoming signals for long range recovery of communication or other processing with.

1. The first step is to identify the problem. In this case, the problem is that the company is not meeting its sales targets.

Notes: The *Flow-Tech* can be used with impact plastic extrusion systems in the latex market as shown; equipment, if necessary, refers to extrusion vessels and hot waterlines. The unit can be converted to surface heating by the rubber and paper mills. In this situation, the *Flow-Tech* is either not needed or constructed into the design of the unit only.
