Stephen Sennott,2004 A balance of sophistication and clarity in the writing authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world s most notable architecture The contents feature major architects firms and professional issues buildings styles and sites the architecture of cities and countries critics and historians construction materials and planning topics schools movements and stylistic and theoretical terms Entries include well selected bibliographies and illustrations Reference that rocks American Libraries May 2005 *Cities and Cultures* Malcolm Miles,2007-04-26 *Cities and Cultures* is a critical account of the relations between contemporary cities and the cultures they produce and which in turn shape them The book questions received ideas of what constitutes a city s culture through case studies in which different kinds of culture the arts cultural institutions and heritage distinctive ways of life are seen to be differently used in or affected by the development of particular cities The book does not mask the complexity of this but explains it in ways accessible for undergraduates The book begins with introductory chapters on the concepts of a city and a culture the latter in the anthropological sense as well as denoting the arts citing cases from modern literature The book then moves from a critical account of cultural production in a metropolitan setting to the idea that a city too is produced through the characteristic ways of life of its inhabitants The cultural industries are scrutinised for their relation to such cultures as well as to city marketing and attention is given to the European Cities of Culture initiative and to the hybridity of contemporary urban cultures in a period of globalisation and migration In its penultimate chapter the book looks at incidental cultural forms and cultural means to identify formation and in its final chapter examines the permeability of urban cultures and cultural forms Sources are introduced positions clarified and contrasted and notes given for selective further reading Playing on the two

meanings of culture Miles takes a unique approach by relating arguments around these meanings to specific cases of urban development today The book includes both critical comment on a range of literatures being a truly interdisciplinary study and the outcome of the author's field research into urban cultures *Multimodality, Meaning, and Institutions* Markus A. Höllerer, Thibault Daudigeos, Dennis Jancsary, 2017-12-06 This volume focuses on the relationship between different modes in the emergence diffusion maintenance and or challenge of social meanings and institutions The contributions demonstrate the potential of multimodal approaches to advance the design of rigorous methods of analysis for the study of multimodal communicative practices Barcelona 1992-2004 Guim Costa, 2004 Barcelona 1992 2004 offers a selection of chronologically arranged projects that provide an overview of the period that commences with the 1992 Olympic Games and culminates in the huge cultural event that is the Universal Forum of Cultures Barcelona 2004 The selection has focused in particular on projects involving the city's openness to the sea and those which have managed to adapt to its existing residential fabric Presented as separate chapters are projects for new high rise buildings and schemes for the 22 plan and the Universal Forum of Cultures The selection is preceded by a text by William J R Curtis in which he explains how the development of Barcelona in recent years can be set within policies of a more international kind followed by an exhaustive urbanistic analysis of the city of Barcelona over the last few decades by Josep Maria Montaner Photographs by Eva Serrats With full colour photographs of the city and plans and illustrations of some of the structures this volume is a comprehensive guide to Barcelona's contemporary urban structures
