And Infrastructure Internet Governance Information Technology:

The Turn to Infrastructure in Internet Governance Francesca Musiani, Derrick L. Cogburn, Laura DeNardis, Nanette S. Levinson, 2016-03-02 This edited volume brings together experts from around the world to provide coverage and analysis of infrastructure's role in Internet governance both now and in the future. Never in history have conflicts over Internet governance attracted such widespread attention. High profile controversies include the disclosures about NSA surveillance by intelligence analyst Edward Snowden, controversy over a decision by the US government to relinquish its historic oversight of Internet names and numbers, and countless cybersecurity breaches involving unauthorized access to Internet users' personal data. Much of the Internet governance ecosystem, both technical architecture and coordinating institutions, is behind the scenes but increasingly carries significant public interest implications. An area once concealed in institutional and technological complexity is now rightly bracketed among other shared global issues such as environmental protection and human rights that have considerable global implications but are simply incongruous with national borders. This transformation into an era of global governance by Internet infrastructure presents a moment of opportunity for scholars to bring these politicized infrastructures to the foreground. Internet Governance and the Global South A.

Bhuiyan, 2014-05-29 A welcome addition to Palgrave's Global Media Policy and Business series, *Internet Governance and the Global South* documents the role of the global south in Internet policymaking and challenges the globalization theories that declared the death of the state in global decision making. Abu Bhuiyan argues that the global Internet politics is primarily a conflict between the states of the United States of America and the states of the global south because the former controls Internet policymaking. The states of the global south have been both oppositional and acquiescing to the sponsored policies of the United States on Internet issues such as digital divide, multilingualism, intellectual property rights, and cyber security. They do not oppose the neoliberal underpinnings of the policies promoted by the United States but ask for an international framework to govern the Internet so that they can work as equal partners in setting norms for the global Internet.

Internet Governance Lee A. Bygrave, Jon Bing, 2009-01-22 The significance of the governance of the Internet is increasing and the issue has become the subject of growing public and media interest. This book takes a detailed, systematic, and non-polemical look at the issue.

Internet Governance Lee A. Bygrave, Jon Bing, 2009-01-22 The question of governance of the Internet is increasing in significance. The United Nations World Summit on the Information Society held in two phases in 2003 and 2005 provoked heated debate, and the resultant meetings of the Internet Governance Forum that followed this have been the subject of growing public and media interest. Yet governance of the Internet is multifaceted, complex, and far from transparent, and there has been little written about the subject which is detailed, systematic, and non-polemical. This book focuses on the issues involved in the ongoing development of Internet governance and the challenges associated with developing and applying governance structures at a global level based on bottom-up consensus seeking decision making.

procedures without direct foundation in a treaty framework. Leading academics and practitioners studying and working in the area of Internet governance explore such issues as how the engineering of infrastructure matters, how legitimacy is gained and retained by governance organizations, and whether elements of such organizations can provide a model for other organizations to emulate. They examine the tensions inherent in Internet governance such as government control versus digital libertarianism, commercialism versus civil society ideals, interests of developed countries versus interests of developing countries. The book will be of interest to academics, researchers, and students of Information and Communications Technology, legal aspects of ICT, and Organization Studies, as well as legal practitioners, government bodies, NGOs, and others concerned with Internet governance.

Internet Governance Ry'mone Griffin, 2018-11-20. This book has shown that Internet governance is already taking place in a variety of localized international regimes, each driven by a distinct politics. While any sweeping global governance regime for the Internet simultaneously raises dangers of intrusive over-centralization and irrelevance, we think that the problems, loopholes, and unsavory politics associated with certain aspects of the existing evolution of governance makes it worthwhile to take a more comprehensive look at the system as a whole. The book also created a framework for the identification of public policy issues associated with Internet governance and looked in greater detail at four specific areas of policy.

An Introduction to Internet Governance Dr Jovan Kurbalija, 2016-11-08. Although Internet governance deals with the core of the digital world, governance cannot be handled with the digital binary logic of the true or false or good or bad. Instead, the subject demands many subtleties and shades of meaning and perception, requiring an analogue approach covering a continuum of options and compromises. The aim of the book *An Introduction to Internet Governance* by Dr Jovan Kurbalija is to provide a comprehensive overview of the main issues and actors in the field through a practical framework for analysis, discussion, and resolution of significant issues. Written in a clear and accessible way, supplemented with figures and illustrations, it focuses on the technical, security, legal, economic, development, sociocultural, and human rights aspects of Internet governance. The text and approaches presented in the book have been used by DiploFoundation and many universities as a basis for training courses and capacity development programmes on Internet governance.
