Autoantibodies in Neurological Diseases Angela Vincent, Gianvito Martino, 2012-12-06 The book covers the immunological and clinical aspects of immune mediated diseases of the central and peripheral nervous system excluding multiple sclerosis It includes paraneoplastic neurological disorders and discusses the immune mechanisms in the growing number of recognised paraneoplastic conditions It not only provides an overview of the field but also discusses the possible role of immunity in other neurological disorders such as epilepsy Chapters are written by scientists and clinicians directly involved in each specific area who have summarized the current understanding of neuroimmunology with emphasis on the underlying abnormalities of the immune responses the different clinical expression of the diseases and the important use of immunotherapies in treatment Figures and tables are included in each chapter

Autoantibodies in Neurological Diseases Angela Vincent, Gianvito Martino, 2001-09-01 Immune mediated neurological disorders present an increasing challenge to neurologists Recent advances have identified new antibodies new effector mechanisms and new diagnostic tests these have greatly enhanced our understanding of disease aetiology and opened up therapeutic opportunities but a critical understanding of this fast developing field is not easy to find This volume was conceived following a very successful course on neuroimmunology in Bergamo in 2000 and was written mainly by clinicians who are active in the laboratory It will help to keep practising neurologists and neuroimmunologists abreast of the most recent developments and to assess new information more critically Angela Vincent and Gianvito Martino should be congratulated on master mind this timely and practical text July 2001 J Newsom Davis Professor Emeritus University of Oxford Table of Contents Introduction Approaches to Understanding Immune Mediated Neurological Disorders Measuring and Evaluating Autoantibodies to Neuronal Antigens G MARTINO A VINCENT

Biomarkers in Autoimmune Diseases of the Central Nervous System Mei-Ping Ding, Long-Jun Wu, Shougang Guo, Honghao Wang, Yin-Xi Zhang, 2023-09-25 Autoimmune diseases of the central nervous system CNS are a group of complex and disabling disorders characterized by the immune system mistakenly attacking the CNS During the last 2 decades we have witnessed a rapidly evolving spectrum of CNS autoimmune diseases which has become a research hotspot in neurology These include CNS inflammatory demyelinating diseases such as multiple sclerosis and neuromyelitis optica

spectrum disorders paraneoplastic and other autoimmune encephalomyelitis and CNS involvement in systemic autoimmune diseases Recently although remarkable discoveries have accumulated more understanding of the autoimmune basis behind the physiopathologic mechanism the exact pathogenic processes are still unclear Patients may present with a variety of manifestations posing a great challenge to diagnosis and management The determination of biomarkers plays a significant role in CNS autoimmune diseases Biomarkers can reflect the presence nature and intensity of certain immune responses triggered by both genetic and environmental processes and bear great importance in guiding clinical diagnosis estimating disease risk or prognosis evaluating disease severity and monitoring progression or response to therapy For instance the detection of disease specific antibodies can contribute to the accurate diagnosis and precise treatment Moreover identifying the diverse biomarkers could further help to achieve the ultimate goal of personalized medicine
