Email and the Everyday Esther Milne, 2024-07-02 An exploration of how email is experienced understood and materially structured as a practice spanning our everyday domestic and work lives Despite its many obituaries email is not dead As a global mode of business and personal communication email outstrips newer technologies of online interaction it is deeply embedded in our everyday lives And yet perhaps because the ubiquity of email has obscured its study this is the first scholarly book devoted to email as a key historical social and commercial site of digital communication in our everyday lives In *Email and the Everyday* Esther Milne examines how email is experienced understood and materially structured as a practice spanning the domestic

and institutional spaces of daily life Email experiences range from the routine and banal to the surprising and shocking Drawing on interviews and online surveys Milne focuses on both the material and the symbolic properties of email She maps the development of email as a technology and as an industry considers institutional uses of email including bureaucratic intensity of workplace email and the continuing vibrancy of email groups and examines what happens when private emails end up in public archives discussing the Enron email dataset and Hillary Clinton s infamous private server Finally Milne explores the creative possibilities of email connecting eighteenth century epistolary novels to contemporary email novels discussing the vernacular expression of ASCII art and mail art and examining email works by Carl Steadman Miranda July and others

Paper Revolutions Sarah E. James,2022-03-29 The experimental practices of a group of artists in the former East Germany upends assumptions underpinning Western art s postwar histories In Paper Revolutions Sarah James offers a radical rethinking of experimental art in the former East Germany the GDR Countering conventional accounts that claim artistic practices in the GDR were isolated and conservative James introduces a new narrative of neo avantgarde practice in the Eastern Bloc that subverts many of the assumptions underpinning Western art s postwar histories She grounds her argument in the practice of four artists who uniquely positioned outside academies museums and the art market as these functioned in the West created art in the blind spots of state censorship They championed ephemeral practices often marginalized by art history postcards and letters maquettes and models portfolios and artists books Through their lived modernism they produced bodies of work animated by the radical legacies of the interwar avant garde James examines the work and daily practices of the constructivist graphic artist painter and sculptor Hermann Glöckner the experimental graphic artist and concrete and sound poet Carlfriedrich Claus the mail artist concrete poet and conceptual artist Ruth Wolf Rehfeldt and the mail artist visual poet and installation artist Karla Sachse She shows that all of these artists rejected the idea of art as a commodity or a rarefied object and instead believed in the potential of art to create collectivized experiences and change the world James argues that these artists entirely neglected by Western art history produced some of the most significant experimental art to emerge from Germany during the Cold War

The Catherwood Project Leandro Katz,Jesse Lerner,2017-10-15 The work of Argentine photographer Leandro Katz is presented here in dialogue with the nineteenth century artist Frederick Catherwood whose images of Maya ruins have fascinated viewers for more than a century Catherwood s daguerreotypes and sketches originally published to illustrate the travel narratives of John Lloyd Stephens are among the most accurate depictions of important Maya sites before the advent of modern archaeology Katz s photos of the same sites most of which are previously unpublished are presented alongside Jesse Lerner s essay which explores their connections to the history of archaeology their resonance in contemporary art and the evolution of an artist who seamlessly integrates form and content

Sound Writing Tobias Wilke,2022-04-21 Considers the avant garde rethinking of poetic language in terms of physical speech production Avant garde writers and artists of the twentieth century radically

reconceived poetic language appropriating scientific theories and techniques as they turned their attention to the physical process of spoken language. This modernist sound writing focused on the bodily production of speech which it rendered in poetic legible graphic form. Modernist sound writing aims to capture the acoustic phenomenon of vocal articulation by graphic means. Tobias Wilke considers sound writing from its inception in nineteenth century disciplines like physiology and experimental phonetics following its role in the aesthetic practices of the interwar avant garde and through to its reemergence in the postwar period. These projects work with the possibility of crossing over from the audible to the visible from speech to notation from body to trace. Employing various techniques and concepts this search for new possibilities played a central role in the transformation of poetry into a site of radical linguistic experimentation. Considering the works of writers and artists including Raoul Hausmann, Kurt Schwitters, Viktor Shklovsky, Hugo Ball, Charles Olson and Marshall McLuhan, Wilke offers a fresh look at the history of the twentieth century avant garde.

absence of clutter Paul Stephens, 2020-03-24. An exploration of minimal writing texts generally shorter than a sentence as complex, powerful literary and visual works. In the 1960s and 70s, minimal and conceptual artists stripped language down to its most basic components: the word and the letter. Barbara Kruger, Jenny Holzer, Carl Andre, Lawrence Weiner and others built lucrative careers from text-based art. Meanwhile, poets and writers created works of minimal writing, visual texts generally shorter than a sentence. One poem by Aram Saroyan reads in its entirety: *eyeye*. In *absence of clutter*, Paul Stephens offers the first comprehensive account of minimal writing, arguing that it is equal in complexity and power to better known, more commercial text-based art. Minimal writing, Stephens writes, can be beguilingly simple on the surface but can also offer iterative reading experiences on multiple levels, from the fleeting to the ponderous. *absence of clutter*, for example, the entire text of a poem by Robert Grenier, is both expressive and self-descriptive. Stephens first sets out a theoretical framework for reading and viewing minimal writing and then offers close readings of works of minimal writing by Saroyan, Grenier, Norman Pritchard, Natalie Czech and others. He reverse-engineers recent works by Jen Bervin, Craig Dworkin and Christian Bök that draw on molecular biology and explores print-on-demand books by Holly Melgard, code poetry by Nick Montfort, Twitter-based work by Allison Parrish and the use of Instagram by Hans Ulrich Obrist and Saroyan. Text, it seems, is becoming ever more prevalent in visual art; meanwhile, poems are getting shorter. When reading has become scanning a screen and writing, tapping out a text, *absence of clutter* invites us to reflect on how we read, see and pay attention.
