gender and the thinking machine

Alison Adam

Artificial Knowing Gender And The Thinking Machine

Michal Rosen-Zvi

Artificial Knowing Gender And The Thinking Machine:

Artificial Knowing Alison Adam, 1998 Alison Adam challenges the masculine slant in the Artificial Intelligence of the world in her book which re-enforces criticisms of the AI project Adam also shows how gender bias is programmed into AI based systems using theories based on feminism

Artificial Knowing Alison Adam, 1998 Artificial Knowing challenges the masculine slant in the Artificial Intelligence AI view of the world Alison Adam admirably fills the large gap in science and technology studies by showing us that gender bias is inscribed in AI based computer systems Her treatment of feminist epistemology focusing on the ideas of the knowing subject the nature of knowledge rationality and language are bound to make a significant and powerful contribution to AI studies Drawing from theories by Donna Haraway and Sherry Turkle and using tools of feminist epistemology Adam provides a sustained critique

Artificial Knowing Alison Adam, 1998 De auteur maakt komaf met de manier waarop artificiële intelligentie gebruikt wordt om het rollenpatroon tussen mannen en vrouwen te benadrukken Zij hanteert een feministische zienswijze omtrent de heersende opvattingen in dit domein en behandelt zowel sociologische filosofische als vrouwentheoretische benaderingen van de technologie

Women, Work and Computerization Ellen Balka, Richard Smith, 2013-11-11 ELLENBALKKA Simon Fraser University ebalka Sfu.ca 1

INTRODUCTION In developing the call for papers for the 7th International Federation of Information Processors IFIP Women Work and Computerization Conference we sought to cast our net widely We wanted to encourage presenters to think broadly about women work and computerization Towards this end the programme committee developed a call for papers that in its final form requested paper submissions around four related themes These are 1 Setting the Course Taking Stock of Where We Are and Where We're Going 2 Charting Undiscovered Terrain Creating Models Tools and Theories 3 Navigating the Unknown Sex Time Space and Place and 4 Taking the Helm Education and Pedagogy Our overall conference theme Charting a Course to the Future was inspired in part by Vancouver's geography which is both coastal and mountainous As such navigation plays an important part in the lives of many as we seek to enjoy our environs In addition as the first Women Work and Computerization conference of the new millennium we hoped to encourage the broad community of scholars that has made past Women Work and Computerization conferences a success to actively engage in imagining and working towards a better future for women in relation to computers The contributions to this volume are both a reflection of the hard work undertaken by many to improve the situation of women in relation to computerization and a testament to how much work is yet to be done

The Gendered Cyborg Fiona Hovenden, Linda Janes, Gill Kirkup, Kathryn Woodward, 2013-09-13 The Gendered Cyborg explores the relationship between representation technoscience and gender through the metaphor of the cyborg The contributors argue that the figure of the cyborg offers ways of thinking about the relationship between culture and technology people and machines which disrupt the power of science to enforce the categories through which we think about being human male and female Taking inspiration from Donna Haraway's groundbreaking Manifesto for Cyborgs the

articles consider how the cyborg has been used in cultural representation from reproductive technology to sci fi and question whether the cyborg is as powerful a symbol as is often claimed The different sections of the reader explore the construction of gender categories through science the interaction of technoscience and gender in contemporary science fiction film such as *Bladerunner* and the *Alien* series debates around modern reproductive technology such as ultrasound scans and IVF assessing their benefits and constraints for women issues relating to artificial intelligence and the internet

Gender and Technology at Work Ellen Balka, Ina Wagner, Anne Weibert, Volker Wulf, 2024-04-04 This book brings together the vast research literature about gender and technology to help designers understand what a gender perspective and a focus on intersectionality can contribute to designing information technology systems and artifacts and to assist organizations as they work to develop work cultures that are supportive of women and marginalized genders and people Drawing on empirical and analytical studies of women's work and technology in many parts of the world the book addresses how to make invisible aspects of work visible how to recognize women's skills without falling into the trap of gender stereotyping how to engage in improving working conditions and how to defend care of life situations and needs against a managerial logic It addresses challenges for design including many overlooked and undervalued aspects such as the complexities involved in human machine interactions as well as the need to create safe spaces for research subjects

Critical Fabulations Daniela K Rosner, 2020-12-29 A proposal to redefine design in a way that not only challenges the field's dominant paradigms but also changes the practice of design itself In *Critical Fabulations* Daniela Rosner proposes redefining design as investigative and activist personal and culturally situated responsive and responsible Challenging the field's dominant paradigms and reinterpreting its history Rosner wants to change the way we historicize the practice reworking it from the inside Focusing on the development of computational systems she takes on powerful narratives of innovation and technology shaped by the professional expertise that has become integral to the field's mounting status within the new industrial economy To do so she intervenes in legacies of design expanding what is considered design to include long silenced narratives of practice and enhancing existing design methodologies based on these rediscovered inheritances Drawing on discourses of feminist technoscience she examines craftwork's contributions to computing innovation how craftwork becomes hardware manufacturing and how hardware manufacturing becomes craftwork

Virtual Gender Alison Adam, Eileen Green, 2005-08-03 As yet there has been relatively little published on women's activities in relation to new digital technologies *Virtual Gender* brings together theoretical perspectives from feminist theory the sociology of technology and gender studies with well designed empirical studies to throw new light on the impact of ICTs on contemporary social life A line up of authors from around the world looks at the gender and technology issues related to leisure pleasure and consumption identity and self Their research is set against a backdrop of renewed interest in citizenship and ethics and how these concepts are recreated in an on line situation particularly in local settings With chapters on subjects ranging from

gender switching on line computer games and cyberstalking to the use of the domestic telephone this stimulating collection challenges the stereotype of woman as a passive victim of technology It offers new ways of looking at the many dimensions in which ICTs can be said to be gendered and will be a rich resource for students and teachers in this expanding field of study

, Chatbots and the Domestication of AI Hendrik Kempt, 2020-09-26 This book explores some of the ethical legal and social implications of chatbots or conversational artificial agents It reviews the possibility of establishing meaningful social relationships with chatbots and investigates the consequences of those relationships for contemporary debates in the philosophy of Artificial Intelligence The author introduces current technological challenges of AI and discusses how technological progress and social change influence our understanding of social relationships He then argues that chatbots introduce epistemic uncertainty into human social discourse but that this can be ameliorated by introducing a new ontological classification or status for chatbots This step forward would allow humans to reap the benefits of this technological development without the attendant losses Finally the author considers the consequences of chatbots on human human relationships providing analysis on robot rights human centered design and the social tension between robophobes and robophiles

Eventually, you will extremely discover a extra experience and deed by spending more cash. yet when? get you bow to that you require to get those every needs behind having significantly cash? Why dont you try to acquire something basic in the beginning? Thats something that will lead you to understand even more in this area the globe, experience, some places, next history, amusement, and a lot more?

It is your totally own era to feat reviewing habit. among guides you could enjoy now is **Artificial Knowing Gender And The Thinking Machine** below.
