Criner,Rodger E. Barnette,Gilbert E. D'Alonzo,2010-06-27 Critical care medicine is a dynamic and exciting arena where
complex pathophysiologic states require extensive knowledge and up to date clinical information An extensive know edge of
basic pathophysiology as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care
in the critically ill is essential Since our first edition 7 years ago new information crucial to the care and understanding of the
critically ill patient has rapidly accumulated Because this knowledge base crosses many different disciplines a comprehensive
multidisciplinary approach presenting the information is essential similar to the multidisciplinary approach that is used to
care for the critically ill patient We have strived to provide this content in an easily digestible format that uses a variety of
teaching tools to facilitate understanding of the presented concepts and to enhance information retention To meet the
demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a
variety of critical illnesses we have substantially revised the prior topics in the first edition with updated information We have
also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress
syndrome an expanded discussion of the physiology and operation of mechanical ventilation obstetrical care in the ICU
neurosurgical emergencies acute coronary syndromes cardiac arrhythmias role of whole body rehabilitation in the ICU ethical
conduct of human research in the ICU and nursing care of the ICU patient *EPA 608 Study Guide* Mike L
