Arrival City The Final Migration And Our Next World:

Arrival City Doug Saunders, 2010-09-21 From one of Canada's leading journalists comes a major book about how the movement of populations from rural to urban areas on the margins is reshaping our world. These transitional spaces are where the next great economic and cultural boom will be born or where the great explosion of violence will occur. The difference depends on our ability to notice. The twenty-first century is going to be remembered for the great and final shift of human populations out of rural agricultural life into cities. The movement engages an unprecedented number of people, perhaps a third of the world's population, and will affect almost everyone in tangible ways. The last human movement of this size and scope and the changes it will bring to family life from large agrarian families to small urban ones will put an end to the major theme of human history: continuous population growth. *Arrival City* offers a detailed tour of the key places of the final migration and explores the possibilities and pitfalls inherent in the developing new world order. From villages in China, India, Bangladesh, and Poland to the international cities of the world, Doug Saunders portrays a diverse group of people as they struggle to make the transition and, in telling the story of their journeys and the history of their often multi-generational families enmeshed in the struggle of transition, gives an often surprising sense of what factors aid in the creation of a stable, productive community.

Arrival City Doug Saunders, 2011-03-22 Look around: the largest migration in human history is under way. For the first time ever, more people are living in cities than in rural areas. Between 2007 and 2050, the world's cities will have absorbed 3.1 billion people. Urbanization is the mass movement that will change our world during the twenty-first century, and the arrival city is where it is taking place. The arrival city exists on the outskirts of the metropolis, in the slums or in the suburbs. The American version is New York's Lower East Side of a century ago or today's Herndon County, Virginia. These are the places where newcomers try to establish new lives and to integrate themselves socially and economically. Their goal is to build communities to save and invest and, hopefully, move out, making room for the next wave of migrants. For some, success is years away; for others, it will never come at all. As vibrant places of exchange, arrival cities have long been indicators of social health. Whether it's Paris in 1789 or Tehran in 1978, whenever migrant populations are systematically ignored, we should expect violence and extremism. But as the award-winning journalist Doug Saunders demonstrates, when we make proper investments in our arrival cities through transportation, education, security, and citizenship, a prosperous middle class develops. Saunders takes us on a tour of these vital centers from Maryland to Shenzhen, from the favelas of Rio to the shantytowns of Mumbai, from Los Angeles to Nairobi. He uncovers the stories, both inspiring and heartbreaking, of the people who live there and shows us how the life or death of our arrival cities will determine the shape of our future.

Arrival City: the Final Migration and Our Next World, 2015 A groundbreaking current affairs book documenting the largest population move in human history as a third of the world's people migrate into cities, rupturing societies across the globe.

Citizenship After Orientalism Engin Isin,2015-10-14 This collection offers a postcolonial critique of the ostensible superiority or originality of Western political theory and one of its fundamental concepts citizenship The chapters analyse the undoing uncovering and reinventing of citizenship as a way of investigating citizenship as political subjectivity If it has now become very difficult to imagine citizenship merely as nationality or membership in the nation state this is at least in part because of the anticolonial struggles and the project of reimagining citizenship after orientalism that they precipitated If it has become difficult to sustain the orientalist assumption the question arises how do we investigate citizenship as political subjectivity after orientalism This book was originally published as a special issue of Citizenship Studies

Spirit and the Obligation of Social Flesh Sharon V. Betcher, 2013-11-11 Drawing on philosophical reflection spiritual and religious values and somatic practice Spirit and the Obligation of Social Flesh offers guidance for moving amidst the affective dynamics that animate the streets of the global cities now amassing around our planet Here theology turns decidedly secular In urban medieval Europe seculars were uncloistered persons who carried their spiritual passion and sense of an obligated life into daily circumambulations of the city Seculars lived in the city on behalf of the city but contrary to the new profit economy of the time with a different locus of value spirit Betcher argues that for seculars today the possibility of a devoted life the practice of felicity in history still remains Spirit now names a necessary prosthesis a locus for regenerating the elemental commons of our interdependent flesh and thus for cultivating spacious and fearless empathy forbearance and generosity Her theological poetics though based in Christianity are frequently in conversation with other religions resident in our postcolonial cities

Desire and Imitation in International Politics Jodok Troy, 2021-03-01 Imitating the desire of others is inherent to the struggle for power in international politics The imitation of desire is a human trait seldom recognized in International Relations studies let alone conceptualized The imitation of desire that takes place among entities as opposed to being intentionally generated by them challenges the conventional wisdom of International Relations that assumes rational autonomous individuals This book identifies the root of Realism pointing out its awareness of the conflicting impact of desire and imitation in a world driven by restless comparison It subsequently demonstrates the conceptual value of mimetic theory while proposing a template of understanding international politics starting from assumptions of disorder and violence This volume not only contributes to the study of conflict based on the imitation of the desire of others among international politics but also proposes in its conceptualization that it is worth looking at studies of agency and structure normative change peace and reconciliation
