Articles Lencyclopédie French Denis Diderot:

The Encyclopédie of Diderot and D'Alembert Diderot, 2009-06-18 The publication of the Encyclopédie in the middle of the eighteenth century is generally recognised as a decisive factor in the conflict of ideas which led to the French Revolution of 1789 Yet despite its importance in the history of eighteenth century French thought no outstanding work of the period is less read today simply because of its bulk and inaccessibility Those parts reproduced in this edition cover religion philosophy science and political and social ideas and include articles which reflect the humanitarian outlook of the contributors and their attitude to the abuses of the ancien régime The selection is of value not only to students of French literature and thought but also to all those interested in the history and political ideas of France on the eve of the Revolution in these pages Diderot D'Alembert and D'Holbach are allowed to speak for themselves instead of having their ideas summarised and sometimes misinterpreted by others *Encyclopedic Liberty* Denis Diderot, Jean Le Rond d'Alembert, 2016 This anthology of 81 articles is the first attempt to translate and collect the most significant political writing from the Encyclopédie 1751-1765 It includes every aspect of the ideas practices and institutions of Western political life

British-French Exchanges in the Eighteenth Century Kathleen Hardesty Doig, Dorothy Medlin, 2009-05-05 France and Great Britain so close geographically but separated by language culture and history had been exchanging merchandise visitors rulers and ideas for hundreds of years before the eighteenth century The flow of traffic only quickened during this period and became a flood in the direction of Great Britain during the decade following the Revolution While certain of these exchanges such as Voltaire's sojourn abroad have been studied in detail others are coming into focus only as scholars study secondary figures in the host country and the interactions of various groups with its citizens *British-French Exchanges in the Eighteenth Century* gathers together fourteen recent essays by scholars from Great Britain and the United States who have examined various parameters of the subject Correspondences and translations are obvious forms of cultural sharing and are in play in many of the essays Others recount and analyse the stories of persons who actually visited the other country in circumstances ranging from pure tourism to emigration to a hostage exchange A final group of essays treats intellectual influences in realms as diverse as encyclopaedism cultural analysis connoisseurship and cosmopolitanism in the arts The volume is appropriate for collections in history literature and culture

The Unfinished Enlightenment Joanna Stalnaker, 2011-05-02 In *The Unfinished Enlightenment* Joanna Stalnaker offers a fresh look at the French Enlightenment by focusing on the era s vast collective attempt to compile an ongoing and provisional description of the world Through a series of readings of natural histories encyclopedias scientific poetry and urban topographies the book uncovers the deep epistemological and literary tensions that made description a central preoccupation for authors such as Buffon Bernardin de Saint Pierre Diderot Delille and Mercier Stalnaker argues that Enlightenment description was the site of competing truth claims that would eventually resolve themselves in the modern polarity between literature and science By the mid nineteenth century the now habitual association between description and the novel was already firmly anchored in French culture but just a century earlier in the diverse network of articles on description in Diderot and d Alembert s *Encyclop die* and in the works derived from it there was not a single mention of the novel Instead we find articles on description in natural history geometry belles lettres and poetry Stalnaker builds on the premise that the tendency to view description as the inevitable and subservient partner of narration rather than as a universal tool for making sense of knowledge in all fields has obscured the central place of description in Enlightenment discourse As a result we have neglected some of the most original and experimental works of the eighteenth century

A Critical Bibliography of French Literature V4 18th C Supplement Richard A. Brooks,

The Shaping of French National Identity Matthew D'Auria, 2020-12-03 Casts new light on of the official French nineteenth century narrative by examining how historians and philosophers conceived of the country s past

The Color of Equality Devin J. Vartija, 2021-08-06 The Enlightenment is often either praised as the wellspring of modern egalitarianism or condemned as the cradle of scientific racism How should we make sense of this paradox *The Color of Equality* is the first book to investigate both the inclusive language of common humanity and the hierarchical language of race in Enlightenment thought seeking to understand how eighteenth century thinkers themselves made sense of these tensions Using three major Enlightenment encyclopedias from England France and Switzerland the book provides a rich contextualization of the conflicting ideas of equality and race in eighteenth century thought Enlightenment thinkers used physical features to categorize humanity into novel racial groups in a discourse that was imbued with Eurocentric aesthetic and moral judgments Simultaneously however these very same thinkers politicized equality by putting it to new uses such as a vitriolic

denunciation of slavery and inhumane treatment that was grounded in the nascent philosophy of human rights Vartija contends that the tension between Enlightenment ideas of race and equality can best be explained by these thinkers attempt to provide a naturalistic account of humanity including both our physical and moral attributes Enlightenment racial classification fits into the novel inclusion of humanity in histories of nature while the search for the origins of morality in social experience alone lent equality a normative authority it had not previously possessed Eschewing straightforward approbation or blame of the Enlightenment The Color of Equality demonstrates that our present day thinking about human physical and cultural diversity continues to be deeply informed by an eighteenth century European intellectual revolution with global ramifications

Musical Debate and Political Culture in France, 1700-1830 Robert James Arnold, 2017 The first full length treatment of the operatic querelles in eighteenth century France placing individual querelles in historical context and tracing common themes of authority national prestige and the power of music over popular sentiment
